I. Introduction

This section contains the product overview, features, configurations, estimated performance standards, and monthly print volume.

A. Overview

The Canon imageRUNNER ADVANCE DX C7700 Series consists of the imageRUNNER ADVANCE DX C7780i, imageRUNNER ADVANCE DX C7770i, and imageRUNNER ADVANCE DX C7765i.

The imageRUNNER ADVANCE DX C7700 Series is a family of high-speed, high-performance color digital imaging devices. The imageRUNNER ADVANCE DX platform features enhancements focused on Workflow Efficiency, Device & Fleet Management Efficiency, Security, Cost Management, Sustainability, and Reliability.

The Canon imageRUNNER ADVANCE DX C7700 Series is the successor to the imageRUNNER ADVANCE C7500 III Series devices.

These models bring the following capabilities to end-users in a high-volume office environment, corporate CRD (Central Reprographic Departments) and Print-for-Pay environments:

Note: For a detailed list of specifications and differences between the models, please refer to the [Specifications](#) section in the [Appendix](#).

- The imageRUNNER ADVANCE DX C7780i is a Segment 5 device that prints and copies Color and B&W (Black and White) (Letter sized sheets) at speeds of up to 70-ppm (pages per minute) and 80-ppm respectively.
- The imageRUNNER ADVANCE DX C7770i is a Segment 4 device that prints and copies Color and B&W (Letter sized sheets) at speeds of up to 65-ppm and 70-ppm respectively.
- The imageRUNNER ADVANCE DX C7765i is a Segment 4 device that prints and copies Color and B&W (Letter sized sheets) at speeds of up to 60-ppm and 65-ppm respectively.
- Standard Single-Pass Duplexing Automatic Document Feeder (ADF) and Color Image Reader with a scanning speed of Up to 270 ipm (Color) at 300 dpi and a capacity of up to 200-sheets (20 lb bond (80 g/m²)).
- A 250 GB hard disk drive (HDD) expandable to a 1 TB HDD, and 4 GB of RAM (Random Access Memory).
- Standard paper sources include two (2) paper cassettes, two (2) paper drawers and one multi-purpose tray that combined, can hold a up to 3,550 sheets of paper (20 lb bond (80 g/m²)). Optional paper input options increase the paper capacity to up to 9,300 sheets (20 lb bond (80 g/m²)).
- Supports a maximum paper size of up to 13" x 19".

- Standard USB 3.0 high-speed connectivity is available on the rear-right side of the machine for connecting devices such as an external Hard Disk. Standard USB 2.0 high-speed connectivity is available on the front-right side of the machine for scanning to or printing from USB memory media.
- Standard Color Universal Send.
- Standard UFR II, PCL5, PCL6, Adobe PostScript 3, and PDF/XPS/TIFF/JPEG Direct Printing.
- The main unit includes a motion sensor designed to reduce the perceived waiting time for the device to recover from sleep mode. The device is able to detect an approaching user, predict the user's intent, and recover from sleep mode accordingly. Likewise, the device can predict when the user is finished using the device and returns to sleep mode. Three (3) sensitivity settings are available and, the motion sensor can be turned off allowing the device to transition to and from sleep mode like predecessor models.
- Standard wireless LAN Support for IEEE 802.11 b,g,n.
- Standard security features available with imageRUNNER ADVANCE DX C7700 Series include:
 - SIEM Integration
 - Verify System at Startup
 - McAfee Embedded Control
 - HDD Data Encryption
 - HDD Data Erase
 - HDD Initialize
 - Forced Hold Printing
 - Encrypted Secure Print
 - Encrypted PDF
 - Digital Signature PDF (Device and User Signature)
 - IPsec
 - SMB 3.0
 - TLS 1.3
- The imageRUNNER ADVANCE DX C7700 Series includes the UFP (Unified Firmware Platform), which provides a common firmware base for the imageRUNNER ADVANCE DX devices and imageRUNNER ADVANCE DX devices.
- All imageRUNNER ADVANCE DX C7700 Series machines are ENERGY STAR Certified.

B. Features

1. Unified Firmware Platform

The UFP (Unified Firmware Platform) provides a common firmware base for the imageRUNNER ADVANCE DX devices and imageRUNNER ADVANCE Third Generation devices. This makes it possible to unify development, and reflect the same functions in all supported devices.

The UFP has been designed for advanced functionality, high-reliability, and ease of operation. The UFP enables digital-business communications, such as imaging technology, cloud connectivity, and mobile solutions to work together.

UFP updates are performed on a regular basis, and include new specifications and enhancements. Critical bug fix firmware updates are released as needed.

The UFP offers the following features and benefits across all supported devices in your fleet:

- Consistent firmware updates (Updates are released on a regular basis)
- New features with new specifications
- Error fixes (Critical bug fix firmware updates are released as needed)

The imageRUNNER ADVANCE DX C7700 Series comes standard-equipped with UFP V3.10, and can be updated to UFP V3.12.

Note: Refer to the imageRUNNER ADVANCE V3.12 System Service Manual for details on all supported features.

2. imageRUNNER ADVANCE DX Series Platform improvements

UI (User Interface) improvements:

- The standard embedded 10.1" Color Wide Super VGA high-resolution TFT screen with flick, pinch, and drag and drop operability¹. The UI provides familiar smartphone-like functionality with an operational soft-key keypad added to the touchscreen UI. An optional Upright Control Panel is available.
- With the introduction of the imageRUNNER ADVANCE DX models, on-screen soft-key support is now standard. The Home screen is comprised of Main Menu buttons and Timeline. The Home screen consolidates the Quick Menu and Main Menu functions. The Timeline displays the settings of the previous 10 jobs performed (copy, scan and send, store, access to stored files, and fax).

¹ Flick is not available on the following screens: one touch menu, [Options] menu in Copy/Box/Send, Settings/Registration. Pinch can be used on any menu or function screen. Default is off, and can be turned on in Settings/Registration -> Preferences -> Accessibility Settings -> Enable Screen Magnification. Drag and Drop to rearrange the button layout in the Quick Menu. Toggle on-off in the bottom right corner.

The imageRUNNER ADVANCE Series UFP V3.12 design improvements include:

- **User Interface Improvements**

- The User Interface now allows a four medium/small-sized button layout on the home screen.
- Function Shortcut display is supported on the home screen. The shortcuts are pinned to the same position on the home screen and each function screen.

- **Optical Character Recognition (OCR) Improvements** – .OCR dark background scanning is now supported with more PDF file types besides Compact PDF.

- **SMTP/POP Server Name Expansion** – Maximum permissible length for the SMTP/POP Server name is expanded to 255 characters.

- **SMB 1.0 Disabled by Default** – SMB 1.0 is disabled as a default setting for both client and server. This encourages users to enable less vulnerable communication protocols.

C. Configuration

Note: All configurations shown are for reference purposes only and are subject to change without notice. Please refer to the Dealer Price List on the Canon Partner Portal (<https://www.partners.usa.canon.com>) for the most up-to-date Item Numbers.

Card Reader Assembly for Universal Keyboard Stand	2212V478

² Item Numbers, eLAN Item Numbers and Part Numbers are subject to change without notice.

¹⁶ Paper Deck Unit-E1, POD Deck Lite-C1 and Multi-drawer Paper Deck-C1 cannot be installed at the same time..

¹⁷ Additional Tab Feeding Attachment for cassettes 3 or 4. The device comes standard with one Tab Feeding Attachment-F1.

¹⁸ Additional Envelope Feeder Attachment for cassettes 3 or 4. The device comes standard with one Envelope Feeder Attachment -F1.

¹⁹ Requires removing the standard Single Pass Duplexing ADF and Reader.

²⁰ When installing USB Keyboard it is recommended to install the Utility Tray-B1 or Universal Keyboard Stand-A1

²¹ Requires the Copy Card Reader Attachment Kit-A4

²² Cannot be installed if Card Reader-F1 is installed.

Table 5 – System Connectivity Accessories

Item	Item Number ²	eLAN Item Number ²³
PCL International Font Set-A1	-	4821B003AA

iR-ADV Security Kit-AH1 for IEEE 2600 Common Criteria Certification ³¹	Available Later	-
Connection Kit-A2 for Bluetooth LE	4041C001AA	-
NFC KIT-E1	4029C001AA	-
Numeric Keypad-A1	4036C001AA	-

² Item Numbers, eLAN Item Numbers and Part Numbers are subject to change without notice.

²³ The eLAN (Electronic License Access Number) is delivered via the CNA section of the Partner Portal.

²⁴ Requires Super G3 FAX Board-AS2

²⁵ Requires Super G3 FAX Board-AS2 and Super G3 2nd Line Fax Board-AS2.

²⁶ Cannot be installed with Super G3 FAX Board-AS2.

²⁷ HDD Mirroring feature requires two hard drives, either one additional 2.5inch/250GB HDD-N1 with standard 250GB HDD or two 2.5 inch/1TB HDD-P1 replacing standard 250GB HDD.

²⁸ 250 GB HDD for mirroring functionality only, cannot be used to increase storage.

²⁹ Voice Guidance Kit-G1 and Voice Operation Kit-D1 cannot be installed at the same time.

³⁰ Requires the Numeric Keypad-A1.

³¹ Includes iR-ADV Security Kit-AH1 for IEEE 2600.1 Common Criteria Certification. Specified configurations and settings need to be applied to the device in order to achieve and maintain IEEE2600.1 CC Certification. Cannot be configured with MEAP Web Connection Kit G3, Remote Fax Kit-A1, imagePASS-N2 V1.1, IP FAX Expansion Kit-B1, Copy Card Reader-F1, NFC KIT-E1, Connection Kit-A2 for Bluetooth LE, all imageWARE options and all MEAP applications.

Fiery Color Profiler Suite Annual Maintenance ³⁹	3077B131AA

² Item Numbers, eLAN Item Numbers and Part Numbers are subject to change without notice.

³² Ships standard with Hot Folder, Paper Catalog Kit and Secure Erase

³³ Includes one license each of Fiery Compose and Fiery Impose.

³⁴ Includes features of Graphic Arts Filters for Hot Folders and Advance Job Management.

³⁵ Refer to the X-Rite i1 Process Control price list for information on customer training and support packages, dealer certification program, NFR and Dealer Showroom Bundles.

³⁶ Service, support and technical assistance are handled directly through X-Rite.

³⁷ Requires maintenance agreement. Includes 1st year of maintenance.

³⁸ A supported spectrophotometer device is required to activate the software license for Color Profiler Suite.

³⁹ For extension from 2nd year. Multiple years of maintenance can be ordered to match a lease contract term.

45 Used for corner/double stapling only. 2 cartridges per case. 5,000 staples per cartridge.

46 Used for booklet finishing only. 2 cartridges per case. 2,000 staples per cartridge.

D. Estimated Performance Standard

The EPS (Estimated Performance Standard) is an estimate of the maximum print and scan volume the machine can achieve during its performance life.

The EPS is based on:

- Regular service by a Canon authorized service technician
- The use of recommended media
- The use of Genuine Canon service and consumable parts

The actual performance of the machine may vary, based on customer usage factors, the physical environment in which the machine is installed, the types of jobs performed, and the types of media used.

The following EPS values are for reference purposes only, and are based on the use of LTR size paper.

Table 10 – Estimated Performance Standard

Item	Estimated Performance Standard
imageRUNNER ADVANCE DX C7780i / C7770i Main Engine	Up to 6,000,000 pages (LTR), or five (5) years, whichever is earlier (including when the machine is powered ON for a whole day)
imageRUNNER ADVANCE DX C7765i Main Engine	Up to 3,000,000 pages (LTR), or five (5) years, whichever is earlier (including when the machine is powered ON for a whole day)
Reader Assembly	Up to 400,000 scans (LTR: fixed reading) Up to 2,000,000 sheets (LTR: stream reading), or five (5) years, whichever is earlier (including when the machine is powered ON for a whole day)

E. Optimum Performance Range and Monthly Copy/Print Volume

1. The Optimum Performance Range

The optimum performance range is the volume range that the equipment is intended to run on a regular basis to maintain a high level of performance and print/copy quality.

Running the equipment within this range ensures that no undue stress is placed on components, and it allows time for the proper servicing and maintenance of the equipment.

2. Maximum Monthly Copy/Print Volume

The maximum monthly copy/print volume is the maximum number of pages the machine can produce within a one-month period (based on letter size paper). However, the device should not be used to produce the maximum number of pages, or a greater volume, on a consistent monthly basis.

Sustained use of the machine at this level will significantly impact the long term performance and durability of the machine. You should expect an increase in the number of service calls and down time during periods of Maximum production use.

Table 11 – Optimum Performance Range and Monthly Copy/Print Volume

Model	Optimum Performance Range (based on LTR sized paper)	Maximum Monthly Volume (based on LTR sized paper)
imageRUNNER ADVANCE DX C7780i	Approximately 15,000-120,000	Up to 350,000
imageRUNNER ADVANCE DX C7770i	Approximately 15,000-100,000	Up to 340,000
imageRUNNER ADVANCE DX C7765i	Approximately 15,000-80,000	Up to 240,000

II. Hardware Accessory Options

Canon-Branded paper feed, accessories and finishers for the imageRUNNER ADVANCE DX C7700 Series.

Refer to the Appendix to see the specifications for the hardware accessory options.

A. Printer Cover-H2

- Printer Cover-H2 is installed in place of the Duplex Image Reader when this machine is used as a printer model.
- This option requires removing the standard Single Pass Duplexing Automatic Document Feeder and Color Image Reader.

B. Paper Deck Unit-E1

- Provides an additional paper capacity of approximately 3,660 sheets (20 lb bond (75 g/m²)).
- Supports LTR-sized paper only.
- Supports paper weights up to 140 lb index (256 g/m²).
- Cannot be installed with the POD Deck Lite-C1 or the Multi Drawer Paper Deck-C1.

C. POD Deck Lite-C1

- Provides an additional paper capacity of approximately 3,660 sheets (20 lb bond (75 g/m²)).
- Supports paper sizes up to 11" x 17".
- Supports paper weights up to 110 lb cover (300 g/m²).
- Cannot be installed with the Paper Deck Unit-E1 or the Multi Drawer Paper Deck-C1.

D. Multi Drawer Paper Deck-C1

- Provides an additional paper capacity of approximately 6,000 sheets (20 lb bond (80 g/m²)).
- Supports paper sizes up to 13" x 19.2".
- Supports paper weights up to 110 lb cover (300 g/m²).
- Includes air assisted and roller pick up & paper feed.
- Optional double-feed detection.

E. Tab Feeding Attachment Kit-F1

- Enables printing on tab paper from Paper Drawer 2.

F. Copy Card Reader-F1

- Enables Department ID Management with the machine. End-users are required to authenticate themselves using a control card before starting an operation.
- Requires the optional Copy Card Reader Attachment-A4.

G. Upright Control Panel-J1

- The upright control panel, features a pressure type 10.4" SVGA Full-Color touchscreen with hard keys.
- The user can adjust the position and angle of the control panel to enable efficient operation.

H. Numeric Keypad-A1

- The Numeric Keypad enables the end user to use hard keys instead of the equivalent soft key buttons available on the User Interface.
- The Voice Guidance Kit and Voice Operation Kit options requires the Numeric Keypad-A1 to operate.

I. Copy Tray-R2

- Simple Tray for Basic output.
- Output capacity up to 250 sheets (1-side)(20 lb bond (80 g/m²)).
- Cannot be installed with the Staple Finisher or Booklet Finisher.

J. Booklet Finisher-X1 and Staple Finisher-X1

- Finisher provides stacking for up to 4,250 sheets of LTR paper (20 lb bond (80 g/m²)).
- Supports corner or double staple up to 100 sheets of paper LTR paper (20 lb bond (80 g/m²)).
- Supports paper weights up to 110 lb Cover (300 g/m²).
- Saddle Stitch Booklet finishing capability for up to 20-sheets (20 lb bond (80 g/m²)) or 80 imaged sides. Booklet Finisher-X1 only.
- Supports Saddle folding up to 5 sheets. Booklet Finisher-X1 only.

K. Booklet Finisher-AC1 and Staple Finisher-AC1

- Finisher provides stacking for up to 3,500 sheets of LTR paper (20 lb bond (80 g/m²)).
- Supports corner or double staple up to 65 sheets of LTR paper (20 lb bond (80 g/m²)).
- Supports Staple Free Binding for up to 4-sheets of paper (20 lb bond (80 g/m²)).
- Supports paper weights up to 110 lb Cover (300 g/m²).
- Saddle Stitch Booklet making for up to 20-sheets (20 lb bond (80 g/m²)) or 80 imaged sides. Booklet Finisher-AC1 only.
- Supports Saddle folding for up to 3 sheets. Booklet Finisher-AC1 only.
- The optional Finisher Jogger Kit-A1 attaches to the output tray, and aligns the output paper.

L. 2/3 Hole Puncher Unit-A1

- Inner puncher provides 2-hole and 3-hole punch capabilities the Staple Finisher-AC1 or Booklet Finisher-AC1.
- Supports paper sizes up to 11" x 17".
- Supports paper weights up to 110 lb cover (300 g/m²).

M. Puncher Unit-BF1

- Inner puncher provides 2-hole and 3-hole punch capabilities for either the Staple Finisher-X1 or Booklet Finisher-X1.
- Supports 2-hole punch for LGL and LTRR paper.
- Supports 3-hole punch for 11" x 17", LTR and EXEC.
- Supports paper weights up to 140 lb index (265 g/m²).

N. Document Insertion Unit-N1

- Inserts pre-printed cover sheets or insertion sheets for binding.
- The upper paper feed tray and lower paper feed tray have a capacity of up to 200 sheets each (total 400 sheets) (20 lb bond (80 g/m²)).
- Supports paper weights up to 110 lb cover (300 g/m²)
- Supports the Staple Finisher-X1 and Booklet Finisher-X1.

O. Paper Folding Unit-J1

- Provides support to Z-fold, Inner C-fold, Outer C-fold, and Half-fold documents up to 28 lb bond (105 g/m²).
- Supports paper sizes up to 11" x 17".
- Supports the Staple Finisher-X1 and Booklet Finisher-X1.

P. Multi Function Professional Puncher-B1

- Provides a variety of punch patterns, which are available as die sets (replaced by the end-user).
- Provides the end-user the ability to create off-line plastic spiral bound books.
- Supports paper sizes up to 12" x 18".
- Supports paper weights up to 110 lb Cover (300 g/m²).

Note: The Multi Function Professional Puncher-B1 does not support punching OHP/transparent media.

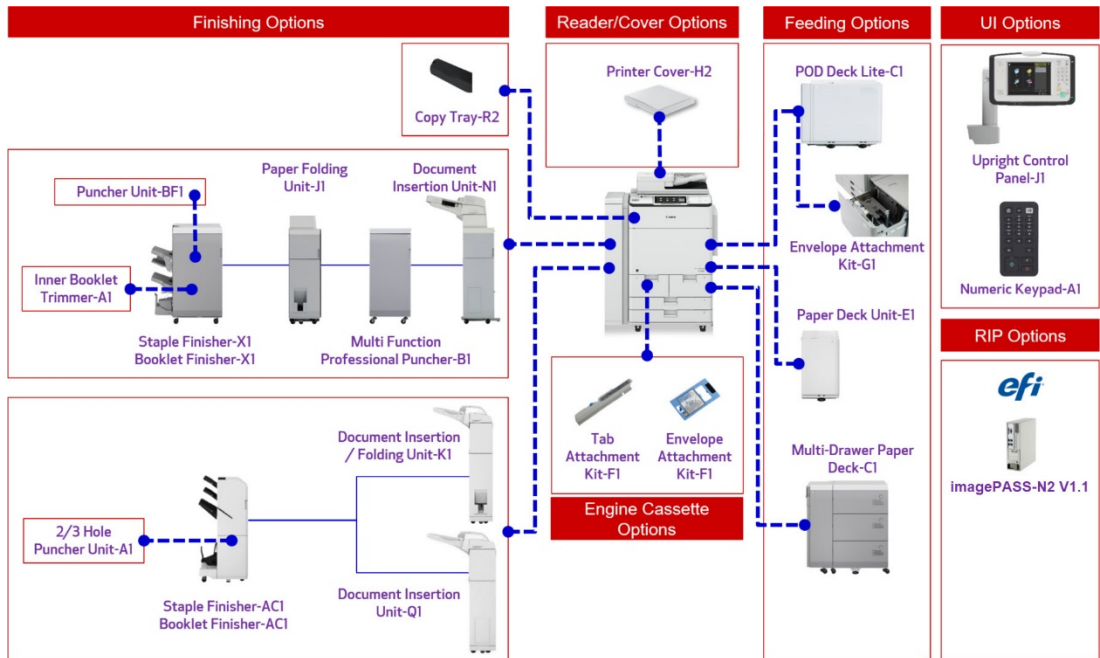

Q. Document Insertion Unit-Q1

- Inserts pre-printed cover sheets or insertion sheets for binding.
- The paper feed tray has a capacity of up to 100 sheets each (20 lb bond (80 g/m²)).
- Supports paper weights up to 140 lb index (256 g/m²).
- Supports the Staple Finisher-AC1 and Booklet Finisher-AC1.

R. Document Insertion/Folding Unit-K1

- Inserts pre-printed cover sheets or insertion sheets up to 140 lb Index (256 g/m²) for binding.
- The paper feed tray has a capacity of up to 100 sheets each (20 lb bond (80 g/m²)).
- Provides support to Z-fold, Inner C-fold, Outer C-fold, and Half-fold documents up to 28 lb bond (105 g/m²).
- Supports the Staple Finisher-AC1 and Booklet Finisher-AC1.

Figure 1 – imageRUNNER ADVANCE DX C7700 Series Hardware Configuration Chart

III. System Features and Options

The functionality of the imageRUNNER ADVANCE DX C7700 Series can be expanded by installing the following system related optional accessories and software.

A. Copy and Print Options

1. imagePASS-N2 V1.1

- An external piggyback print controller for the imageRUNNER ADVANCE DX C7700 Series machines, and supports Adobe Genuine PostScript 3 and PCL6.
- Suited for office environments in which larger print volumes are frequently processed, or for users who use Adobe PostScript or other PostScript applications.
- Optional software available for the imagePASS-N2 V1.1 is Fiery Compose, Fiery Impose, and Fiery ImageViewer.

2. Barcode Printing Kit-D1

- Provides the ability to print 1D and 2D barcodes on output.
- Requires license activation via the LMS.

3. Secure Watermark

This Standard Feature enables the user to embed hidden text in the background of copies. The embedded text becomes visible when copies of the document are made on a copier.

B. Universal Send

The Universal Send features are available as a standard with the main engine.

1. Universal Send Trace & Smooth PDF

- Enables the user to make Trace & Smooth PDF, and Adobe Reader Extensions PDF files.

2. Universal Send Security Feature

- Enables the user to encrypt PDF and Digital Device Signature PDF/XPS files, as well as set a password to send them safely to a file server or e-mail address.
- Enables the recipient of a PDF or Digital Device Signature PDF/XPS file to verify which device scanned the file.

3. Universal Send Digital User Signature

- Enables the user to add a digital user signature obtained from a certificate authority to a PDF or XPS file. This enables the recipient of a PDF or XPS file to verify which user signed it.

C. Fax Options

1. Super G3 FAX Board-AS2

- Provides a single line to send and receive fax documents.
- Documents that have been created in applications can also be sent directly from a computer via a network.

2. Super G3 2nd Line Fax Board-AS2

- Provides two lines to send and receive fax documents.
- Requires the Super G3 FAX Board-AS2.

3. Super G3 3rd/4th Line Fax Board-AS2

- Provides up to four lines to send and receive fax documents.
- Requires the Super G3 FAX Board-AS2, Super G3 2nd Line Fax Board-AS2.

4. IP FAX Expansion Kit-B1

- Enables faxing over VoIP lines that support the T.38 Transmission Control Protocol.
- Requires the Super G3 FAX Board-AS2.
- Cannot be installed with the Super G3 2nd Line Fax Board-AS2.
- Requires license activation via the LMS.

5. Remote Fax Kit-A1

- The Remote Fax Kit-A1 enables an imageRUNNER ADVANCE DX device without a Fax board installed (the client device) to utilize the Super G3 Fax board installed in another imageRUNNER ADVANCE DX device (the fax server) to send and receive fax documents via the server.
- The client imageRUNNER ADVANCE DX device and the fax server imageRUNNER ADVANCE DX device must be on the same network.
- The Remote Fax Kit-A1 requires license activation via the LMS.
- The Remote Fax Kit and the Super G3 FAX Board cannot be installed together.

D. Accessibility Options

1. Voice Guidance Kit-B2

- The Voice Guidance Kit provides visually-impaired users to hear voice navigation instructions when operating the machine.
- The Numeric Keypad-A1 is required to use this option.

2. Voice Operation Kit-D1

- The Voice Operation Kit provides visually-impaired users to hear voice navigation instructions when operating the machine.
- The Voice Operation Kit also includes a voice recognition function, which enables users to set the various functions of the machine using their voice.
- The Numeric Keypad-A1 is required to use this option.

3. ADF Access Handle-A1

The ADF Access Handle attaches to the Automatic Document Feeder to enable seated users to open the document feeder.

IV. Document Storage Capabilities

The imageRUNNER ADVANCE DX C7700 Series machines offer methods to store and access scanned documents and files via built-in storage and external storage.

- Mail Box
- Network
- Memory Media
- Advanced Box Client

IMPORTANT

- Canon U.S.A., Inc. (hereinafter referred to as “Canon USA”) is not responsible for any damages caused to user data that is stored on the hard disk drive of the machine. It is the customer’s responsibility to create and maintain a data backup plan. Canon USA offers several security options to enhance document handling and storage security needs. See [Security Features and Options on Page 25](#).
- It is strongly recommended to back up data stored on the hard disk drive.

A. Mail Box

The Mail Box is a data storage area that provides the ability to store files temporarily for on-demand printing or reprint purposes.

The Mail Box function enables users to store files that are scanned with this machine, or data sent from a personal computer via the printer driver. The stored files can be printed (or reprinted) anytime using the desired user settings. When combined with the Send Function the file format of the scanned documents can be converted into another file format (PDF, JPEG, and TIFF), and sent via e-mail or fax or sent to a file server or another mailbox. Up to 100 files in the mailbox at a time can be selected to send. The files in Mailbox can be edited. Files can be incorporated into other files in the mailbox, duplicated, or have pages deleted. The Mailbox privacy allows password protection for each Mailbox or labeling the Mailbox for individual users. In addition, various editing features are available, such as merging separately stored files, duplication or deleting pages from a file.

B. Network

The imageRUNNER ADVANCE DX C7700 Series machines are equipped with a collaboration function that enables them to be connected to other imageRUNNER ADVANCE DX machines via the SMB/WebDAV protocol. When one machine is connected to another machine, a user can select an Advanced Box in the other machine (if it is on the network) to store files or print a file that is stored in the other machine on this machine.

C. Memory Media

Scan to USB memory media support is standard on the imageRUNNER ADVANCE DX C7700 Series machines. Users can attach a USB memory stick to the USB port to scan and store documents in the PDF, JPEG, TIFF, XPS or OOXML file format. Users can also print files stored in the memory media from an imageRUNNER ADVANCE DX C7700 Series machine at any time with the desired print settings.

System Administrators can restrict scanning to and printing from memory media independently to safeguard sensitive and confidential information.

D. Advanced Box

Advanced Box is a storage area in the machine that stores scanned documents and Microsoft Office files that can be used on a computer. There are two types of storage in the Advanced Box: the Shared Space and the Personal Space. Multiple users can access shared space folders. (a team, group, or department members). A single user can access personal space folders. Up to 1,000 files/folders (main folder and subfolders) can be saved in each level.

Documents can be scanned with this machine, stored in the PDF, JPEG, TIFF (B&W), XPS and OOXML (.docx/.pptx) file format, and can also be printed on this machine at any time with the desired print settings. Starting with UFP 3.10, the user can search for files in the Advanced Box.

The Advanced Box can be opened to the public as an SMB (Server Message Block) server or WebDAV (Distributed Authoring and Versioning) server. This enables the end-user to access the Advanced Box from a computer, and store and share files in their native format, such as MS Word, Excel, and PowerPoint. To view and print these native format files from the Advanced Box, the user must access them via a computer.

IMPORTANT

It is strongly recommended to protect the Advanced Box folders from viruses. If the user's computer system has an antivirus system in place, add the Advanced Box folders to its list of folders to scan and protect.

V. Security Features and Options

The imageRUNNER ADVANCE DX C7700 Series machines include a comprehensive set of security features, such as Device Authentication, Data Security, Document Security, and Network Security.

Options available for the imageRUNNER ADVANCE DX C7700 with the imagePASS Server attached.

A. Authentication and Usage Management

1. Universal Login Manager

ULM (Universal Login Manager) is a MEAP application, developed by NT-ware, that provides log in management capabilities, such as simple user authentication, Local Authentication, and Domain Authentication for Canon imageRUNNER ADVANCE DX devices. These user authentication methods use Picture Log In, PIN Codes, or Proximity Card Log In methods to gain access to the machine. Although, ULM is a server-less authentication solution, it can also integrate with the Access Management System for advanced security. Furthermore, ULM can be upgraded to the full uniFLOW platform, which provides mobile printing, secure printing, advanced security, and scanning workflow capabilities, along with a fully-automated statistics and reporting suite.

Note: ULM is available as a download for the imageRUNNER ADVANCE from the [e-Support Center Website](#) or via the NT-Ware Website. To activate the ULM, the PC/Workstation used for activation must have access to the Internet.

2. Department ID Management

Register a Department ID and password for each department, and manage the machine by limiting its use to only those who enter the correct Department ID and password. Department IDs and passwords for up to 1,000 departments can be registered. Use Department ID Management to keep track of the copy, scan, and print totals for each department.

3. UA (Universal Authentication)

A user authentication system that enables the functions of the machine and MEAP applications to be used by a user after being authenticated once. UA has two compatible user authentication systems (Domain Authentication and Local Device Authentication). Domain Authentication is linked to a domain controller in a Windows Active Directory environment on a network. Local Device Authentication uses a database inside the machine to authenticate users. Administrators can use one of these two systems or both at the same time. The Access Management System is a subset of the UA system.

4. Card Reader Solutions

The imageRUNNER ADVANCE DX C7700 Series supports card authentication solutions. These solutions can be combined with Department ID management and the UA login service.

5. Access Management System

The Access Management System (AMS) enables system administrators to restrict various Copy, Print, fax, Scan, Mail Box/Advanced Box, and Send functions that each user can use. Once the AMS is activated, a Function Level Log-In can be used to authenticate users for specific device features only. SSO-H and AMS must be activated to use Function Level Log-In.

6. uniFLOW Online

uniFLOW Online is a cloud-based secure printing and cost tracking solution. It is used to help businesses manage their print environment without having to invest in a print server infrastructure, and enables them to keep control of the full printing and scanning process.

uniFLOW Online contains these features:

- Flexible authentication (for example, PIN Code or Card)
- Secure Printing
- Send Print Jobs from Anywhere (mobile printing)
- Simple document scanning (for example, Scan to My E-Mail, Google Drive, OCR PDF, and image enhancement)
- Track print, copy, scan, and fax costs
- Cloud-based infrastructure

A uniFLOW trial is available at no charge, and includes all the features of uniFLOW Online. At the conclusion of the trial, and if the full uniFLOW Online solution has not been purchased, the following features will no longer be accessible:

- Secure Printing
- Send Print Jobs from Anywhere (mobile printing)
- A part of Simple document scanning (for example, image enhancement)

IMPORTANT

uniFLOW Online only supports TLS V1.2 and earlier.

Note: To purchase a license of uniFLOW Online, training is required. Training is required to obtain support for uniFLOW Online or the uniFLOW Online trial from Canon's Technical Support Center. For more information on uniFLOW Online training, go to the Training section on the [e-Support Center Website](#).

7. uniFLOW Online Express

uniFLOW Online Express is a cloud-based authentication and cost tracking solution. It is used to help businesses manage their print environment without having to invest in a print server infrastructure, and enables them to keep control of the printing and scanning process.

uniFLOW Online Express comes with the following features:

- Flexible authentication (for example, PIN Code or Card)
- Simple document scanning (for example, Scan to My E-Mail and Google Drive)
- Track print, copy, scan, and fax costs
- Cloud-based infrastructure

IMPORTANT

uniFLOW Online Express only supports TLS V1.2 and earlier.

Note: To install uniFLOW Online Express, training is not required. However, uniFLOW Online Express training is required to receive uniFLOW Online Express support from Canon's Technical Support Center. Dealers which have taken uniFLOW Online training are automatically certified for uniFLOW Online Express. For more information on uniFLOW Online and uniFLOW Online Express training, go to the Training section on the [e-Support Center Website](#).

B. Data Management and Security

The imageRUNNER ADVANCE DX C7700 Series machines offer several ways to protect and secure data. It is strongly recommended that a backup and security system is in place, along with an antivirus protection system to make sure that no data on the hard disk drives are lost, stolen, or compromised.

There are several security methods available from Canon U.S.A., Inc. that appropriately addresses a customer's needs for securing data.

- Customer Accessible HDD Initialization Function (Initialize All Data/Settings)
- imageRUNNER ADVANCE Trusted Platform Module
- Data Encryption Kit
- Optional Security Kits (HDD Data Erase Kit and Mirroring Kit)

CAUTION

Canon U.S.A., Inc. is not liable for any damages resulting from the loss or corruption of data. (See the [DISCLAIMER](#), on page [ii](#) for further details.)

1. Initialize All Data/Settings Function

The Initialize All Data/Settings function is a standard function on all Canon devices. This setting is available in the Management Mode, to which the system administrator must authenticate. Performing this function, erases all user information on the hard disk drive of the machine (e.g., contact information, Advance Box and Mail Box data, network settings, and image data). The initialize All Data/Settings feature is enhanced to support up to nine (9) times data erase. This process may take more than 30 minutes to complete.

IMPORTANT

The Initialize All Data/Settings deletes the FAT (File Allocation Table) and overwrites the target HDD data area with "0" (zeros) one time.

2. TPM (Trusted Platform Module)

TPM is a standard security chip (tamper resistant hardware) installed in the imageRUNNER ADVANCE DX C7700 Series machines. The TPM provides a facility for the secure generation of cryptographic keys, encrypts information stored on the internal HDD, and decrypts information read from the internal HDD. The public keys to encrypt confidential information are securely controlled by the TPM chip, and they can only be decrypted if the TPM releases the associated decryption key. If the HDD is removed from the machine, it will be difficult to retrieve data off that HDD since the encryption key for that data is stored in a separate location within the TPM.

CAUTION

Once the TPM setting is activated, if the end user fails to back up the TPM key, or if the end user loses the TPM key, it may result in permanent, unrecoverable data loss, for which Canon U.S.A., Inc. is not liable. (See the [DISCLAIMER](#), on page [ii](#) for further details.)

IMPORTANT

- If the TPM setting is activated and the TPM chip fails, the confidential information stored on the chip can only be recovered if Canon's service representative replaces the TPM chip and restores the original TPM key to the new chip. Immediately, back up the TPM key on a USB memory stick, after the TPM setting is activated.
- Only the Administrator of the machine can back up the TPM key.
- For security reasons, the TPM key can only be backed up once. Store the USB memory with the backup data in a safe place.
- For the backup of the TPM key, it is recommended that a USB memory stick (supported system file: FAT32) with free space of 10 MB or more is used.
- The TPM seals the hardware components associated with the data, and the data cannot be accessed unless the specific TPM key is issued by the TPM chip. Therefore, setting the TPM mode to 'On', may affect service procedures and service costs (if not handled properly). It is strongly recommended that the Administrator who has access to the TPM key be present for all service calls to prevent the loss of data and productivity of the machine.

3. HDD Data Erase

The HDD Data Erase feature is available as standard for the imageRUNNER ADVANCE Series for environments requiring additional data security measures. This feature will automatically overwrite and erase image data immediately after the job is completed; therefore, no trace of the data remains on the hard disk. It will perform an overwrite of up to three (3) times with random data for maximum-security protection depending on preferences set by the system administrator.

4. HDD Data Erase Scheduler

HDD Data Erase scheduler is an optional MEAP application available for supported imageRUNNER ADVANCE models that aids in safeguarding information and supporting security compliance. The solution enables system administrators to schedule HDD overwrite on Canon devices at a set time (daily, weekly and monthly) or Overwrite HDD data on-demand. System administrators receive a printed confirmation report upon execution of scheduled or on-demand overwriting.

5. HDD Data Encryption Kit

The HDD Data Encryption Kit is a standard feature for the imageRUNNER ADVANCE Series designed to protect all temporary data and stored documents on the internal disk drive through industry-standard encryption algorithms. The HDD Data Encryption Kit encrypts all image data and device settings before storing them on the hard drive

6. HDD Data Mirroring Kit-J1

The HDD Data Mirroring Kit backs up the data on the hard disk drive to the optional HDD. (The engine HDD and the HDD used for mirroring must be of the same storage capacity).

The optional 2.5 inch/250 GB HDD-N1 or 2.5 inch/1 TB HDD-P1 is required for mirroring.

C. Document Security

The imageRUNNER ADVANCE DX C7700 Series machines offer several document security modes to protect printed and distributed documents.

1. Adobe LiveCycle Rights Management ES Server Integration

Adobe LiveCycle enables System Administrators to set automatic document privileges and apply security policies by creating Policy Protected PDF files on the machine, even after document creation, using the Adobe LiveCycle Rights Management ES Server. Once a Policy Protected PDF document is created on the machine with this feature enabled, the PDF extension in Adobe Reader, upon attempt by a user to open a protected PDF, contacts the Rights Management Server to check the latest authorized users, expiration, auditing, and watermarking policies set by the System Administrator. These latest policies are then enforced by that application to ensure the information in that document remains secure.

IMPORTANT

- To generate a PDF linked with Adobe LiveCycle Rights Management ES Server, the Adobe LiveCycle Rights Management ES Server must be licensed, pre-configured by a System Administrator, and the machine must be connected to the Intranet or Internet.
- Encrypted PDF and PDF/A-1b documents are not compatible with Adobe LiveCycle Rights Management ES Server.

2. PDF/XPS Visible Digital Signature

The PDF/XPS Visible Signatures mode enables the user to view the device signature and user signature on PDF/XPS files. Visible digital signatures and user signatures are displayed on the first page of the PDF/XPS file to account for the origin of the document. The system administrator of the machine can set the Visible Signatures mode for all PDF/XPS documents or certain PDF/XPS documents created on the machine. This mode differentiates from the Digital Signature mode in that instead of having to access digital signature information from the document properties from the File menu, this information is displayed prominently on the first page of the document in the background, and is printed along with the document data, thereby deterring improper distribution of sensitive documents.

3. Encrypted Secure Print

This standard function enables the user to encrypt print data sent from a computer by using the Secured Print function, and then decrypt it at the device.

4. iR-ADV Security Kit-AH1 for IEEE 2600 Common Criteria Certification

The optional imageRUNNER ADVANCE Security Kit-AH1 ⁴⁷ certifies that the imageRUNNER ADVANCE DX C7700 Series complies with IEEE standard 2600⁴⁸. IEEE 2600 is a standard to protect hardcopy devices in a commercial information-processing environment where a moderate level of document security, network security, and security assurance are required. The iR ADV Security Kit-AH1 enables an administrator to configure security settings that are required to comply with the IEEE 2600 standard.

IMPORTANT

- The imageRUNNER ADVANCE Security Kit-AH1 for IEEE 2600 Common Criteria Certification ships device firmware that complies with IEEE 2600.1 certification when installed to the imageRUNNER ADVANCE DX C7700 Series machines.
- Once the imageRUNNER ADVANCE Security Kit-AH1 for IEEE 2600 Common Criteria Certification is installed, imageRUNNER ADVANCE DX C7700 Series machines can only be upgraded with firmware versions certified for the IEEE standard 2600. Upgrading to non-certified firmware invalidates the IEEE standard 2600 certification, although the machine will continue to operate properly.

Notes:

- This feature is not available at the time of initial product launch.
- The iR ADV Security Kit-AH1 includes the IEEE 2600 License Certificate, Bootable CD with certified system software, IEEE 2600 User Manual CD, Installation Manual and Mirroring Kit. The HDD Data Encryption Kit and the Data Erase Kit are available as standard.
- Cannot be configured with MEAP Web Connection Kit G3, Remote Fax Kit-A1, imagePASS-N2 V1.1, IP FAX Expansion Kit-B1, Copy Card Reader-F1, NFC KIT-E1, Connection Kit-A2 for Bluetooth LE, all imageWARE options and all MEAP applications".

⁴⁷ Not available at the time of the imageRUNNER ADVANCE DX C7700 Series product launch

⁴⁸ A protection profile of the evaluation assurance level "EAL3+ALC_FLR.2"

D. Network Security

The imageRUNNER ADVANCE DX C7700 Series machines secure network communications by using IP Address and MAC (Media Access Control) Address filters, encryption and authentication, and network port and application access control.

1. IPsec

IPsec (IP security) software is supported as a standard feature on the imageRUNNER ADVANCE DX Series to ensure information privacy and security for Internet Protocol (IP) communications over the network. It encrypts all inbound and outbound network traffic to protect against malicious attacks such as eavesdropping, alternation, and impersonation.

2. Filtering by Port Number

Using the Address Filter system administrators can grant or deny access to the imageRUNNER ADVANCE DX Series for specific groups or users via Port numbers (MAC Addresses). Port Number filtering permits or rejects incoming packets from IP addresses or ranges of IP addresses. In addition, IP address filters to outbound connections can be applied. For example, if functions, such as Remote Copy and Universal Send are used, system administrators can block or restrict users from sending files to specific IP addresses. This minimizes the risk of data being sent out of the company to systems that are not trusted.

3. IPv6

Internet Protocol Version 6 (IPv6) is a network layer protocol designated as the successor to IPv4 for general use on the Internet. Support for IPv6 adds extended business value to the imageRUNNER ADVANCE DX Series.

4. Wired / Wireless Security and Authentication

The imageRUNNER ADVANCE DX Series machines support IEEE 802.1X, which provides port-based authentication and security for wired connections. IEEE 802.1X is also available for wireless connections.

E. Device Security

1. Security Policy Settings

The security policy function is used to collectively configure the security-related settings into one security policy. The security policy settings are managed by a system administrator who serves as a security administrator. The system administrator who serves as a security administrator accesses the security policy function is only available via the Remote User Interface.

The security policy setting function can be protected with a security policy password to distinguish between system administrators and system administrators who serve as security administrators.

A Security Administrator can reflect policy settings that comply with the security policies of his/her company in the devices under his/her charge to restrict people, other than the security administrator, from using functions that do not comply with the policies, or from changing the security policy setting values.

The information configured in the security policy can be exported or imported by using the Device Configuration Management function or the imageWARE Enterprise Management Console Device Configuration Management Plug-In, and can be copied to multiple devices.

Refer to the imageRUNNER ADVANCE DX C7700 Series Service Manual for more details

2. Restrict Service Representation Access Function

The Restrict Service Representation Access Function is available for the system administrator to prevent leakage and loss of user information by restricting operations related to user information and security due to unauthorized use of service mode. This setting can be enabled from the Local User Interface or Remote User Interface.

There are three settings available:

- 'Off' - All the items in service mode can be executed. (default setting)
- 'Off (Auth. Needed)' – The settings related to user assets in service mode can be configured/executed by performing system administrator authentication before accessing the service mode.
- 'On' - The settings related to user assets in service mode can no longer be configured/executed. The Restrict Service Representative Access setting will need to be changed for access to settings related to user assets in service mode.

Refer to the imageRUNNER ADVANCE DX C7700 Series Service Manual for more details and a list of service mode restrictions.

IMPORTANT

In the event that the system administrator password becomes unavailable, the password can be cleared by the service technician using service mode if the Restrict Service Representation Access Function is set to 'Off'.

If the Restrict Service Representation Access function is set to 'On' or 'Off (Auth. Needed)', then a license key is required to initialize the device administrator password. The service technician will need to contact the Technical Support Center to request a license key to initialize the device administrator password (the device serial number is required). Once entered, the license key will clear the administrator password from the device. A new administrator password will need to be set.

3. Verify System at Startup

Verify System at Startup uses RoT (Root of Trust) functions to protect the device from unauthorized modification of the BIOS, firmware, and applications. Verify System at Startup stops the unverified processes and produces an error code for system servicing.

Note: Verify System at Startup is disabled by default and, when activated, may increase device warm-up time by 20 to 40 seconds, depending on the model.

4. SIEM (Security Information and Event Management) Integration

Enables the device to automatically send audit logs to SIEM systems for analysis and detection of security violations. Examples of the audit logs sent via the Syslog protocol (RFC5424 and RFC5426) include those for user authentication, mailbox operation, network authentication, and print jobs. Sending audit logs via TLS encryption (RFC5425) is also supported.

5. McAfee Embedded Control

Protects the machine's firmware, programs, and operating system from potential threats and malware. All firmware and applications are checked against a whitelist that enables only trusted firmware and applications to launch. This helps to prevent malware, and mitigates zero-day attacks.

Note: This function is set to 'Off' by default, and must be set to 'On' within the device settings. In addition, Verify System at Startup must be set to 'On' within the device settings.

VI. Software Solutions

The optional software applications available for purchase to enhance the end-user experience and interaction with imageRUNNER ADVANCE DX C7700 devices.

A. Document Management and Binding

1. imageRUNNER ADVANCE Desktop

A client-based device dashboard application to operate document publishing, management, and printing from an end-user's PC. In addition, this desktop application can be used with Canon's imageWARE Document Server application in cases where customers want to share documents that are managed across workgroups or departments.

2. imageRUNNER ADVANCE Quick Printing Tool

The imageRUNNER ADVANCE Quick Printing Tool is a standard feature within imageRUNNER ADVANCE Desktop. The Quick Printing Tool enables the end-user to print, fax, convert documents to PDF files, or open PDF documents in Desktop Binder via a drag-and-drop action without needing to open imageRUNNER ADVANCE Desktop. The user can also monitor the status of inbound and outbound print and fax jobs, as well as apply print templates automatically, or preview documents before printing via the Desktop Binder option.

3. Therefore

Therefore is an information management solution that enables users to securely store electronic information. Stored documents can be quickly and easily found, and customized document workflows may be created to increase efficiency and profitability. Documents that are saved to Therefore are classified by categories (the primary means of document classification in Therefore). Index data in a category is associated with each saved document.

Therefore includes tools for keyword dictionary searching, configuration of security and permissions, and primary and backup storage. Therefore also supports document scanning with Canon multi-functional devices with its Therefore MFP Application, as well as with scanners that have ISIS/TWAIN drivers. Users may connect to Therefore by way of the Internet, or with Therefore Web Access and Mobile Access to manage documents wherever they are.

4. eCopy PDF Pro Office

ePPO (eCopy PDF Pro Office⁴⁴) is a network to desktop office scanning solution that enables end-users to create and share PDFs, edit PDF files, and convert PDF files into searchable, editable, and fully-formatted Microsoft Office or Corel WordPerfect files. ePPO also enables the user to tag PDF files for accessibility and Section 508 compliance.

⁴⁴ No longer available for purchase.

B. Scan Management Software

1. Authorized Send

Authorized Send is a MEAP application, which enables walk-up users to distribute documents quickly and securely. Authorized Send is an adaptable solution that integrates and authenticates with a wide variety of authentication servers and enterprise systems using common protocols. Authorized Send permits only authorized users to scan and send documents to e-mail addresses, network file servers/folders, and fax servers. An end-user is able to specify scan settings, such as the paper size, resolution, brightness, and file format.

2. eCopy ShareScan

eCopy ShareScan is an enterprise-ready, office scanning software solution that enables imageRUNNER ADVANCE DX devices to turn paper documents into digital data that can be edited, managed, and stored electronically.

3. uniFLOW (Scanning)

uniFLOW enables users to capture and compress scanned data, customize workflows for each document type or per user, and archive documents.

4. uniFLOW Online

uniFLOW Online is a cloud-based secure printing and cost tracking solution. It is used to help businesses manage their print environment without having to invest in a print server infrastructure, and enables them to keep control of the full printing and scanning process.

Refer to the [Authentication and Usage Management](#) Section, page [25](#) for details.

5. uniFLOW Online Express

uniFLOW Online Express is a cloud-based authentication and cost tracking solution. It is used to help businesses manage their print environment without having to invest in a print server infrastructure, and enables them to keep control of the printing and scanning process.

Refer to the [Authentication and Usage Management](#) Section, page [25](#) for details.

IMPORTANT

uniFLOW Online and uniFLOW Online Express only support TLS V1.2 and earlier.

C. Print/Output Management Software

1. Direct Print & Scan for Mobile

Direct Print & Scan for Mobile⁴⁴ is a combination of a MEAP application that runs on an imageRUNNER ADVANCE DX device and a client mobile application that runs on certain BlackBerry smartphones, Android, and Apple iPhone and iPad devices.

The Direct Print & Scan for Mobile⁴⁴ application enables users to connect mobile devices to an imageRUNNER ADVANCE machine to print documents, e-mail messages, attachments, and images, as well as load scanned data from the imageRUNNER ADVANCE machine to their mobile device.

⁴⁴ No longer available for purchase.

2. uniFLOW

uniFLOW is a print/output management solution that can be customized to meet the needs of an organization. uniFLOW offers an organization of any size, a way to track printing and copying costs, secure sensitive documents, and enable users to print from any available printer on the network.

3. uniFLOW Online

uniFLOW Online is a cloud-based secure printing and cost tracking solution. It is used to help businesses manage their print environment without having to invest in a print server infrastructure, and enables them to keep control of the full printing and scanning process.

Refer to the Authentication and Usage Management Section on page 25 for details.

4. uniFLOW Online Express

uniFLOW Online Express is a cloud-based authentication and cost tracking solution. It is used to help businesses manage their print environment without having to invest in a print server infrastructure, and enables them to keep control of the printing and scanning process.

Refer to the Authentication and Usage Management Section on page 25 for details.

IMPORTANT

uniFLOW Online and uniFLOW Online Express only support TLS V1.2 and earlier.

5. **AA-PRINT (Advanced Anywhere Print)**

The AA-PRINT solution combines Universal Login Manager with secure anywhere printing. It is designed to provide a serverless print environment that enables end-users to print and track usage from anywhere within the network to any connected device by submitting their respective authentication credentials.

6. **EFI PrintMe**

EFI PrintMe is a cloud-based mobile print solution for the imageRUNNER ADVANCE Series that enables end-users to print electronic files from their mobile devices, such as smartphones, tablets, and laptops to a Canon imageRUNNER ADVANCE DX device through the EFI PrintMe Cloud Service. Files uploaded to the EFI PrintMe Cloud Server are secured with 128-bit encryption. Walk-up end-users can print documents from the EFI PrintMe Cloud Service to a registered imageRUNNER ADVANCE DX device that is connected to the Internet.

7. **Canon Mobile Printing**

The Canon Mobile Printing application provides simple mobile print functionality. The Canon Mobile Print app is available for a free download on the Apple iPhone and iPad devices, or Android smartphones and tablets, and supports a wide variety of Canon devices.

Expanded support includes Apple AirPrint and Mopria.

D. Device Security and Management Software

1. AA-PROX (Advanced Authentication – Proximity Card)

The AA-PROX⁴⁴ solution is a login platform that authenticates walk-up end-users to the machine via a registered proximity card or by entering a user name and password. AA-PROX⁴⁴ authenticates users against an Active Directory or local user database on devices, and can be combined with the AMS (Access Management System) and imageWARE ADVANCE Tracker⁴⁴ to track usage and enforce access control to system functions.

⁴⁴ No longer available for purchase.

2. uniFLOW Device Security & Management

uniFLOW, the print/output management solution, includes multiple authentication methods to enable an organization to restrict machine access and functions on a per user basis. uniFLOW end-users must authenticate themselves either by entering their user name and password, or by using a smart card, proximity or magnetic card.

3. uniFLOW Serverless Secure Print

uniFLOW Serverless Secure Print is a secure printing and follow-me printing option that utilizes the end-user's client PC to store secure print jobs until the end-user can authenticate and release the secure print jobs at an imageRUNNER ADVANCE DX device. The imageRUNNER ADVANCE DX device then pulls the print job from the end-user's client PC. uniFLOW Serverless Secure Print is scalable and upgradeable to the full version of uniFLOW.

4. uniFLOW Online

uniFLOW Online is a cloud-based secure printing and cost tracking solution. It is used to help businesses manage their print environment without having to invest in a print server infrastructure, and enables them to keep control of the full printing and scanning process.

Refer to [Authentication and Usage Management](#), page [25](#) for details.

5. uniFLOW Online Express

uniFLOW Online Express is a cloud-based authentication and cost tracking solution. It is used to help businesses manage their print environment without having to invest in a print server infrastructure, and enables them to keep control of the printing and scanning process.

Refer to [Authentication and Usage Management](#), page [25](#) for details.

IMPORTANT

uniFLOW Online and uniFLOW Online Express only support TLS V1.2 and earlier.

6. imageWARE Enterprise Management Console and Plug-ins

iW EMC (imageWARE Enterprise Management Console) is a Web-based network device management utility that enables IT managers to control and manage all devices installed on the network from one central location. IT managers can discover devices, view device status, manage device settings, and notify users of device errors via e-mail.

The capabilities of imageWARE Enterprise Management Console can be expanded by using optional plug-in applications. The optional plug-ins are available for IT managers and dealers through <http://www.imageware.com>, or to the dealer only through Canon U.S.A.'s [e-Support Center Website](#).

7. imageWARE Secure Audit Manager Express

imageWARE Secure Audit Manager Express captures and archives the contents and attributes of all jobs performed on the device. This enables System Administrators to continuously track and archive network activities.

8. MEAP Web Connection Kit

MEAP Web enables development partners to create customized applications, which connect imageRUNNER ADVANCE DX machines to business applications and business process workflows by communicating through standard Web services and HTML protocols.

9. MDS Cloud

The Canon MDS (Managed Document Services) Cloud is a PAAS (Platform as a Service) solution. It consists of an MDS Collection and Configuration Agent, which is installed at the customer's site, to discover devices and gather information from a customer's complete fleet of devices, such as meter reads, manage job logs, remotely configure devices, third party device support, and manage consumables.

E. Business Workflow Software

1. Forms and Print Services for Salesforce

Forms and Print Services for Salesforce⁴⁴ is a cloud service that enables users to print and store reports and graphic sales data directly to their imageRUNNER ADVANCE machine without the need for print drivers.

⁴⁴ No longer available for purchase.

2. Enterprise Imaging Platform

Enterprise Imaging Platform enables users to automate document and image related business processes.

VII. Dealer Sales/Service Authorization and Educational Training

To become authorized to sell, service and maintain the imageRUNNER ADVANCE DX C7700 Series a dealership must have at least one (2) technicians who successfully completed at least one (1) of the learning paths below.

The learning path for the imageRUNNER ADVANCE DX C7700 Series Devices has been designed to build the knowledge and skills of your support professionals that will affect your customers in the most positive manner, both in the support of the product and the solutions you offer.

A. Learning Path for Existing Technicians

Prior to servicing the imageRUNNER ADVANCE DX C7700 Series, it is strongly recommended technicians successfully complete the Update Online Training program.

Table 12 – Learning Path for Existing Technicians

Course Name	Course Code ⁴⁹	Required
imageRUNNER ADVANCE DX C7700 Series Hardware Update	19IRTADXC77U000	No

B. Learning Path for New Technicians

Prior to taking the imageRUNNER ADVANCE DX C7700 Series Training program, technicians must successfully complete prerequisite training. The training includes online training, classroom and virtual classroom courses. See the Service Training Solutions site for offerings at Canon U.S.A.'s [e-Support Center Website](#).

Table 13 – Learning Path for New Technicians

Course Name	Course Code ⁴⁹	Required
imageRUNNER ADVANCE C9000/C9200/C7000/C7200 Online Training (MUST COMPLETE FOUNDATIONAL TRAINING)	19IRTAC90921000	Yes
imageRUNNER ADVANCE C9000/C9200/C7000/C7200/C7500 Classroom	19IRTAC9092751C	Yes
imageRUNNER ADVANCE C9000/C9200/C7000/C7200/C7500 Classroom Final	19IRTAC9092751C_ASMT	Yes
imageRUNNER ADVANCE C7500 III Series Update Online Training	19IRTAC7500IUP000	Yes
imageRUNNER ADVANCE DX C7700 Series Hardware Update	19IRTADXC77U000	No

⁴⁹ Course names and course codes are subject to change without notice.

C. Foundational Prerequisites

Prior to taking the imageRUNNER ADVANCE DX C7700 Series Blended Training program, technicians must successfully complete Canon's Foundational Training Program which includes online and blended programs. See the Canon U.S.A.'s [e-Support Center Website](#) Service Training Solutions site for offerings.

- Canon Foundations or Equivalent Curriculum
- Systems Technology Curriculum
- Basic Color Principles Curriculum
- imageRUNNER ADVANCE Systems Curriculum
- Universal Login Manager/ eULM Curriculum

D. Certification

- imageRUNNER ADVANCE DX C7780i / C7770i / C7765i
- imageRUNNER ADVANCE C7580i III / C7570i III / C7565i III
- imageRUNNER ADVANCE C7580i II / C7570i II / C7565i II
- imageRUNNER ADVANCE C7580i / C7570i / C7565i

The successful completion of the training programs and passing of the final assessment exam are required to sell this product.

E. Who Should Attend

It is required any technician responsible for installing, servicing, or supporting the imageRUNNER ADVANCE DX C7700 Series machines successfully complete the blended training course and pass the final assessment exam.

Note: Our current support policy dictates that only those technicians who have completed the training program and pass the final assessment exam are entitled to live, phone-based support through our TSC (Technical Support Center). However, self-service support (software downloads, knowledgebase articles, support forums, technical publications) is available through our [e-Support Center Website](#) for all technicians. (Refer to the Technical Support section on the e-Support Center Website for entitlement details.)

F. uniFLOW Online and uniFLOW Online Express Training Courses

1. uniFLOW Online

The uniFLOW Online eLearning course will prepare technicians with the knowledge required for setting up and configuring uniFLOW Online in the field.

Notes:

- Service technicians who completed the uniFLOW Online training are entitled to live, phone-based support through the Canon USA TSC.
- uniFLOW Online training provides certification for uniFLOW Online and uniFLOW Online Express.

2. uniFLOW Online Express

The uniFLOW Online Express eLearning course will prepare technicians with the knowledge required for setting up and configuring uniFLOW Online Express in the field.

Notes:

- Service technicians who completed the uniFLOW Online or uniFLOW Online Express Training are entitled to live, phone-based support through the Canon USA TSC.
- uniFLOW Online Express training does not provide certification for uniFLOW Online.

Table 14 – uniFLOW Online and uniFLOW Online Express Training

Course Name	Course Code ⁴⁹
uniFLOW Online Training	18SOFUFONL000
uniFLOW Online Express Training	18SOFUFONEX000

⁴⁹ Course Names and Course Codes are subject to change without notice.

G. Data Backup Service Training Course

The Data Backup Service eLearning course will prepare technicians with the knowledge required for setting up and configuring Data Backup Service in the field. Training is required to allow the servicing dealer to enroll in Data Backup Service. Service technicians who complete the Data Backup Service training are entitled to live, phone-based support through the Canon USA TSC.

Table 15 – Data Backup Service Training

Course Name	Course Code ⁴⁹
Data Backup Service Training	18SOFDBS000

⁴⁹ Course Names and Course Codes are subject to change without notice.

H. Multi Function Professional Puncher-A1/B1 Training

To service the Multi Function Professional Puncher-A1/B1, service technicians must complete the following:

1. Learning Path for Technicians certified on the Professional Puncher-B1

Table 16 – Multi Function Professional Puncher Training for Technicians Certified on the Professional Puncher-B1

Course Name	Course Code ⁴⁹
Multi Function Professional Puncher - A1/B1 Update Online Training	19IPCMPPA1U00O

⁴⁹ Course Names and Course Codes are subject to change without notice.

2. Learning Path for New Technicians

Table 17 – Multi Function Professional Puncher Training for New Technicians

Course Name	Course Code ⁴⁹
Multi Function Professional Puncher Fundamentals Online Training	19IPCMFPPF00O
Multi Function Professional Puncher Fundamentals Classroom 1-Day Classroom Course	19IPCMFPPF01C

⁴⁹ Course Names and Course Codes are subject to change without notice.

I. Training Facilities

1. Online Courses

The online courses are located in the e-Learning center on the Canon USA [e-Support Center Website](#). Certification maps on the [e-Support Center Website](#) provide easy access to the training. The online courses can be conducted at any dealer facility that is suitable for online student learning.

2. Classroom Training Facilities

Classroom training is available in each of the five Canon Regional Training Centers:

- Jamesburg, New Jersey
- Norcross, Georgia
- Irving, Texas
- Itasca, Illinois
- Irvine, California

J. Course Equipment

- Windows workstation (Windows 7 or higher)
- Microsoft Internet Explorer v11.0 or higher
- Applicable accessories (hardware and software)

K. Service Materials

The materials required for the imageRUNNER ADVANCE DX C7700 Training Program are listed in the table below.

Table 18 – Service Materials

Model	Item	Location
imageRUNNER ADVANCE DX C7700 Series	e-Learning Training Program	Conducted online
	Service Manual	Downloadable from within the e-Learning course and the e-Support Center Website
	Parts Catalog	

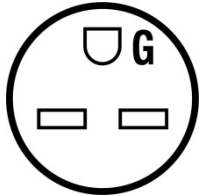

VIII. Servicing Notes

A. Power and Plug Requirements

Canon USA Inc. strongly suggests dedicated and properly grounded outlets be provided for these imageRUNNER ADVANCE DX devices.

- The imageRUNNER ADVANCE DX C7780i Main Unit requires a dedicated single-phase 208V – 240V/15A NEMA 6-15R receptacle for proper operation.
- The imageRUNNER ADVANCE DX C7770i/DX C7765i Main Unit requires a dedicated single-phase 120V/20A NEMA 5-20R receptacle for proper operation.

Table 19 – Power Receptacle

imageRUNNER ADVANCE DX C7780i Main Unit	imageRUNNER ADVANCE DX C7770i / DX C7765i Main Unit
 <p data-bbox="488 982 742 1012">NEMA 6-15 Receptacle</p>	 <p data-bbox="1047 982 1300 1012">NEMA 5-20 Receptacle</p>
<p>Accessories / Controllers</p>	
 <p data-bbox="764 1289 1018 1318">NEMA 5-15 Receptacle</p>	

IMPORTANT

- We recommend an additional standard 120 V/15 A NEMA 5-15 outlet for service tools, such as a laptop computer or vacuum that may be used when servicing or configuring the machine.
- Use only dedicated and properly grounded outlets for the main unit and imagePASS Controller. It is also strongly suggested to use dedicated and properly grounded outlets for each optional accessory. Do not use extension cords. The ground connection serves to provide the internal electronics with a reference voltage. Faulty or poor ground sources will cause this reference voltage to fall into a range that no longer serves as a reliable reference voltage. The internal logic and programming of the imageRUNNER ADVANCE DX machines will not perform reliably if there is an insufficient difference between the internal operating signal voltages and the poor ground reference signal. A qualified electrician can measure and provide the ground source that the imageRUNNER ADVANCE DX machines or any computer controlled office equipment requires.
- Before installation, confirm that all necessary receptacles are available.
- Phase converters and step down transformers are not supported

Figure 2 – Power and Plug Requirements configured with the X1 Finisher

Figure 3 – Power and Plug Requirements configured with the AC1 Finisher

Table 20 – Power and Plug Requirements for Main Unit and Accessories

Description	Power Supply	Power Supply Specifications
imageRUNNER ADVANCE DX C7780i	208V – 240V/15A outlet	NEMA 6-15

B. Installation Dimensions & Weight

The imageRUNNER ADVANCE DX C7700 Series approximate weight and dimensions differ depending on its configuration with the optional accessories. The dimensions are for reference only and should not be confused with the required space for installation.

Table 21 – Dimensions

Unit	Width		Depth		Height	
Main Unit (without the upright control panel)	27 1/8"	689 mm	36 7/8"	937 mm	46 5/8"	1,185 mm
Main Unit (with the upright control panel) ⁵⁰	58 7/8"	1,495 mm	36 7/8"	937 mm	55 1/4"	1,403 mm
Paper Deck Unit-E1	14 1/4"	363 mm	24 7/8"	630 mm	22 1/2"	572 mm
POD Deck Lite-C1	25 7/8"	656 mm	27"	686 mm	22 1/2"	572 mm
Multi Drawer Paper Deck-C1	38 3/4"	985 mm	31 3/8"	797 mm	41"	1,040 mm
Staple Finisher-X1 ⁵¹	30 3/4"	782 mm	30 1/8"	765 mm	41"	1,040 mm
Booklet Finisher-X1 ⁵¹	35 1/4"	896 mm	30 1/8"	765 mm	41"	1,040 mm
Staple Finisher-AC1 ⁵²	25 7/8"	656 mm	24 1/2"	623 mm	47 1/8"	1,195 mm
Staple Finisher-AC1 ⁵²	25 7/8"	656 mm	24 1/2"	623 mm	47 1/8"	1,195 mm
Document Insertion Unit-N1	29 3/8"	746 mm	31 1/4"	793 mm	55 3/8"	1,407 mm
Paper Folding Unit-J1	13 1/4"	336 mm	31 1/4"	793 mm	46 7/8"	1,190 mm
Document Insertion Unit-Q1	26 1/8"	662 mm	26 3/4"	679 mm	48 7/8"	1,242 mm
Document Insertion / Folding Unit-K1	26 1/8"	662 mm	26 3/4"	679 mm	48 7/8"	1,242 mm
Multi Function Professional Puncher-B1	31 3/8"	795 mm	17 1/2"	445 mm	41"	1,040 mm
Puncher Unit-BF1	Inside of the Staple Finisher-X1 / Booklet Finisher-X1					
2/3-Hole Puncher Unit-A1	Inside of the Staple Finisher-AC1 / Booklet Finisher-AC1					
Finisher Jogger Kit-A1						
Copy Tray-R2 ⁵¹	16 1/2"	420 mm	15"	382 mm	6 7/8"	175 mm
Copy Card Reader-F1 ⁵³	3 1/2"	88 mm	3 13/16"	96 mm	1 5/8"	40 mm
imagePASS-N2 V1.1	11 1/4"	285 mm	3 5/8"	93 mm	11 5/8"	295 mm

⁵⁰ Width to the right edge of the upright control panel in the rightmost position. Height to the top of the upright control panel in the standard position.

⁵¹ With the Auxiliary Tray extended.

⁵² When the auxiliary tray and rotation tray are extended

⁵³ Excluding the attachment kit and cable.

Table 22 – Weight

Component	Approximate Weight	
Main Unit (Toner bottle excluded)	549 lb	249 kg
Paper Deck Unit-E1	75 lb	34 kg
POD Deck Lite-C1	149 lb	68 kg
Multi Drawer Paper Deck-C1	341 lb	155 kg
Staple Finisher-X1	141 lb	64 kg
Booklet Finisher-X1	242 lb	110 kg
Staple Finisher-AC1	79.4 lb	36 kg
Booklet Finisher-AC1	132.3 lb	60 kg
Document Insertion Unit-N1	134 lb	61 kg
Paper Folding Unit-J1	156 lb	71 kg
Document Insertion Unit-Q1	88.2 lb	40 kg
Document Insertion / Folding Unit-K1	167.6 lb	76 kg
Multi Function Professional Puncher-B1	225 lb	102 kg
Puncher Unit-BF1	6.6 lb	3 kg
2/3-Hole Puncher Unit-A1	17 lb	7.7 Kg
Copy Tray-R2	2.4 lb	1.1 kg
Copy Card Reader-F1 ⁵⁴	7.1 oz	200 g
imagePASS-N2 V1.1	10.9 lb	4.95 kg

⁵⁴ Including the attachment kit and cable.

C. Installation Space Requirements

The imageRUNNER ADVANCE DX C7700 Series machine approximate installation space requirements may differ, depending on how the machine is configured and the optional accessories attached. Always ensure that there is enough space for servicing and operation of the main unit and configuration.

⚠ WARNING

Do not place anything around the machine or the breaker, as doing so may prevent access to the breaker in an emergency, possibly resulting in personal injury or damage to the machine.

📄 IMPORTANT

Rear Space:

- Provide at least 4" (100 mm) behind the machine to the wall for unrestricted operation, including the opening of the main unit doors.
- Provide at least 31.5" (800 mm) behind the machine to the wall when the Main Unit is configured with one or more of the following accessories: The Paper Folding Unit-J1, Multi Function Professional Puncher-B1, Document Insertion Unit-N1, or Multi-drawer Paper Deck-C1.

Front and Side Space:

- Make sure that at least 19 3/4" (500 mm) of space is available around the front, left, and right sides of the Main Unit.

Additional Space Requirements

- The machine should not be moved once it is in place.

Table 23 – Installation Space Main Unit Without Options

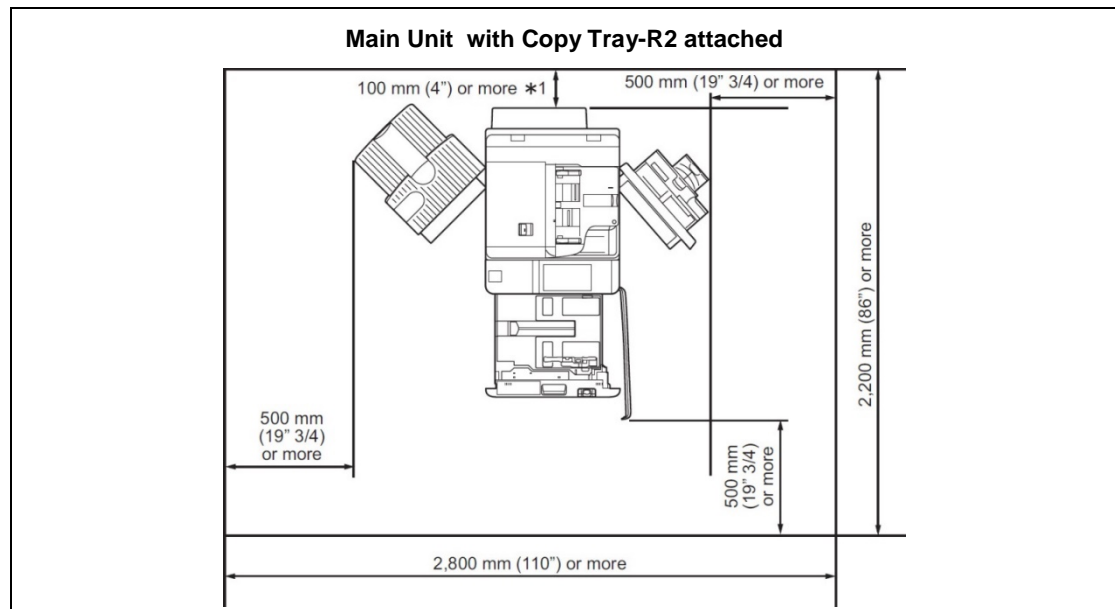

Table 24 – Installation Space Main Unit with Finishing and Paper Feed Options

D. Estimated Installation Times

The table below indicates the estimated length of time needed to unpack and install the main unit and optional accessories, calculated from the average amount of labor hours. The estimated unpack and installation times are based on a minimum of one (1) experienced technicians unless otherwise specified.

 **IMPORTANT**

Setup time varies due to many factors, most of which the installation technician has little control over. Some obstacles may include:

- Forklift availability and its operator
- Narrow hallways or a need to remove doors to enter rooms
- Uneven or damaged floors making leveling equipment difficult and time consuming

With the above-mentioned obstacles considered, an installation of imageRUNNER ADVANCE DX C7700 Main Unit can take longer than the estimated total times below.

Table 25 – Estimated Installation Times

Description	Estimated Total Time
imageRUNNER ADVANCE DX C7700 Series Main Unit ⁵⁵	41 minutes
Printer Cover-H2	27 minutes
Upright Control Panel-J1	34 minutes
Paper Deck Unit-E1	9 minutes
POD Deck Lite-C1	13 minutes
Multi-Drawer Paper Deck-C1	22 minutes
Paper Deck Double Feeding Detection Kit-A1	18 minutes
Copy Tray-R2	4 minutes
Staple Finisher-X1	14 minutes
Booklet Finisher-X1	16 minutes
Staple Finisher-AC1	14 minutes
Booklet Finisher-AC1	13 minutes
Document Insertion Unit-N1	27 minutes
Document Insertion Unit-Q1	27 minutes
2/3 Hole Puncher-A1	8 minutes
Puncher Unit-BF1	17 minutes
Multi Function Professional Puncher-B1	10 minutes
Document Insertion / Folding Unit-K1	12 minutes

⁵⁵ Installation time includes the DADF

Table 25 – Estimated Installation Times Continued

Description		Estimated Total Time
Paper Folding Unit-J1		22 minutes
Inner Booklet Trimmer-A1		17 minutes
Buffer Pass Unit-M1		14 minutes
Finisher Jogger Kit-A1		9 minutes
Utility Tray-B1		5 minutes
Numeric Keypad-A1		6 Minutes
Super G3 FAX Board- AS2		6 minutes
Super G3 2nd Line Fax Board- AS2		14 minutes
Super G3 3rd/4th Line Fax Board- AS2		8 minutes
imagePASS-N2 V1.1		14 minutes
Voice Guidance Kit-G1		21 minutes
Voice Operation Kit-D1		13 minutes
iR-ADV Security Kit-AH1 for IEEE 2600.1 Common Criteria Certification		66 minutes
Serial Interface Kit-K3		7 minutes
Copy Control Interface Kit-A1		6 minutes
2.5inch/250GB HDD-N1		10 minutes
2.5inch/1TB HDD-P1		10 minutes
HDD Mirroring Kit-J1		19 minutes
Copy Card Reader-F1 + Copy Card Reader Attachment-A4	Upright Control Panel	13 minutes
	Flat Control Panel	12 minutes
Connection Kit-A2 for Bluetooth LE		5 minutes

E. Recommended System Engineer Requirements

An SE (System Engineer) ⁵⁶ is recommended to work with Canon's software solutions and networked devices, and should have the following basic job functions:

- Systems Integration (pre-sales, professional services and post-sales)
- Technical Education
- Advanced Troubleshooting

To perform the above tasks successfully, it is crucial that the SE have strong software solutions, IT infrastructure and working knowledge in the following areas:

1. Major computer platforms (PC and Mac based)
2. Operating systems:
 - Windows
 - Mac OS
 - Linux
3. Protocols/Services:
 - TCP/IP
 - SMTP/SMB/FTP
 - SNMP
 - TLS/IPSEC
 - Active Directory
4. Printing
 - Print Driver (PCL, PS, UFR)
 - Print processor
 - Print spooler
 - Print queue
5. Scanning

It is also important that the SE have computer skills and working knowledge in Remote Support Tools – (WebEx, TeamViewer, Windows RDC)

The Education/Training of a successful Canon dealership's SE include:

1. CompTIA A+/Network +/Security +
2. Microsoft Certified
3. Two years of experience as a Computer Technician, Network Administrator or related software support position.
4. A degree in Computer Science or Networking Technology or two years of extensive experience in the above areas.

⁵⁶ An SE (System Engineer) is a professional title often used by hardware vendors for individuals who perform systems related tasks, such as analysis, design, and programming. System Engineers are also often involved in pre-sales activities.

F. Canon Remote Services

Canon Remote Services are a suite of tools and best practices that Canon USA provides to dealers to help maximize efficiency and reduce labor costs.

Canon Remote Services provide the following benefits to customers and dealerships:

- Retrieve meter readings for billing, which reduces the need for an on-site meter read or a phone call to the customer to read the meters.
- Anticipate part requirements by monitoring the service meters. The service technician can monitor the page counter and service part counter data to anticipate when a part requires replacement and have the part available during the next scheduled service visit.
- Investigate machine issues before visiting the customer site. Service alerts and service meters can be used so that the service technician can visit the customer with the necessary information and parts to reduce revisits due to the unavailability of service parts.
- Monitoring service alert data provides the ability to resolve simple issues over the phone, which may reduce the need for an on-site service visit.

For more information about Canon Remote Services, refer to the Remote Services page on the [Canon e-Support Center Website](#).

1. imageWARE Remote

imageWARE Remote is a service that facilitates the automatic collection of page counter, service parts counter, alarm, jam, and error code data. This information is transmitted to the UGW (Universal Gateway) Server from Canon devices equipped with the eRDS (embedded Remote Diagnostic System), or with the optional RDS (Remote Diagnostic System) Plug-In for imageWARE Enterprise Management Console.

A servicing dealer has access to the UGW Web Portal, an interface to view and retrieve collected meter and service data. Additionally, the UGW Web Portal can be used to monitor and manage the use of consumables.

IMPORTANT

- To register the machine in the UGW, the main engine serial number must be used.
- imageWARE Remote only supports TLS V1.2 and earlier.

a. Embedded Remote Diagnostic System

eRDS is a function that is built into the device that allows the device to communicate meter and service information to the UGW.

eRDS must be enabled and a successful COM-TEST must be performed before a device can report to the UGW.

b. Remote Diagnostic System Plug-in

The optional RDS ⁵⁷ Plug-In for the imageWARE Enterprise Management Console retrieves meter and service information from up to 1,000 Canon printers, Canon multifunction devices and third-party devices using the standard printer MIB (Management Information Base). The RDS Plug-In transmits the collected data directly to the UGW.

Note: eRDS-capable devices can also be monitored using the RDS Plug-in.

2. Optional Integration Applications

Optional integration applications are available to automatically download meter and service alert data to your dealership's back-end device management system. For more information, refer to the Remote Services page on the [Canon e-Support Center Website](#).

3. UGW SnapShot

The UGW SnapShot tool consolidates commonly-used data from the UGW into a format accessible from an Internet-capable device (mobile phone, tablet, or a personal computer).

Service technicians can use this tool to check device status prior to a service call.

For more information, refer to the Remote Services page on the [Canon e-Support Center Website](#).

4. Device Management Tool

The Device Management Tool is a Web application that can be used to register, manage, and unregister individual or multiple devices in the UGW.

The Device Management Tool can create customer profiles, contract information, and associate devices with a customer.

5. Dealer Dashboard

The Dealer Dashboard displays key device and user activity for the Remote Services tools. The information helps our Service Partners monitor the devices in a fleet (including total registered devices, actively reporting devices, not reporting devices, and devices without a COM TEST) and the user status (including active and inactive users, and remote services tool activity). The Dealer Dashboard includes an option to send regular reports via e-mail to specified users. For more information, refer to the Remote Services page on the Canon USA's e-Support Center Website.

⁵⁷ The imageWARE Enterprise Management Console and Remote Diagnostic System Plug-in are available at no charge. For more information, refer to the Technical Publication TP10 360 available from the [Canon e-Support Center Website](#).

6. Content Delivery System

The CDS (Content Delivery System) is a system that delivers and installs firmware and MEAP (Multifunction Embedded Application Platform) applications. The advantages of the CDS include reduced service costs (labor and travel), improved first-call resolution, and provides access to the latest version of firmware.

IMPORTANT

Content Delivery System only supports TLS V1.2 and earlier.

There are three methods to deliver firmware updates:

Table 26 – CDS Firmware Delivery Methods

Method		Download Firmware	Install Firmware	Frequency	Cost Savings
	Scheduled Update (at device)	Automatic	Automatic	Recurring periodically	Fully unattended updates after initial one-time setup (less than 5 minutes)
	Update (remotely through UGW + CDS)	13 hours to 7 days in advance	Automatic	One time as scheduled	Eliminate technician visits
			Manual		Reduce duration of technician visit
	Update (at device)	Up to 7 days in advance	Automatic	One time as scheduled	Fully unattended update after configuring (less than 5 minutes), when using automatic installation.
			Manual	One time on demand	

Method A – Ensures that the device always has the latest version of firmware installed. After a one-time setup by the service technician, the machine automatically downloads and installs new firmware as it becomes available. Further visits may not be necessary for firmware updates.

Method B – Enables the dealership to schedule a firmware download to the machine via the UGW. This method also provides the option to install the firmware either automatically (without a service technician on-site), or manually by a service technician.

Method C – Provides a service technician with access to the latest firmware while at the machine. A service technician also has the option to schedule the installation at a later time. Although a site visit is required for each firmware update, the service technician does not need to bring the firmware to the site.

7. Remote Operator's Software Kit

The Remote Operator's Software Kit provides alternative access for end-users with mobility or dexterity impairments. This software emulates the device's control panel and hard keys on a computer screen, allowing end-users to operate all system functions (copy, print, fax, scan, and send) from a network-connected computer.

Service technicians and helpdesk personnel can use the Remote Operator's Software Kit for remote management, troubleshooting, and support. The Remote Operator's Software Kit can also provide access to Service Mode. Additionally, it can be used to demonstrate device features and functions to end-users.

Note: The procedure to enter Service Mode using the Remote Operator's Software Kit should not be shown to the end-user.

G. Device Configuration Management

1. Device Configuration Manager

DCM (Device Configuration Management) is a function to migrate the device settings information (Settings/Registration Basic Information and Service Mode Settings) as backup data, installation (replacement/mass installation) to the same model or installation to a different model.

The settings can be imported/exported using Remote UI, service mode, or imageWARE Enterprise Management Console DCM Plug-in.

Backup data can be stored to the PC via Remote UI and to USB memory media or the HDD via the service mode.

Refer to the imageRUNNER ADVANCE DX C7700 Service Manual for details.

2. Device Migration Navigator

The Device Migration Navigator is an application that can help the service technician select the best tool (Remote UI, USB Memory Media) to migrate device settings for installation (replacement/mass installation) and/or data backup/restoration.

Notes:

- Available at no charge from the [Canon e-Support Center Website](#) Download Center.
- Available for the imageRUNNER ADVANCE DX C7700 with the imagePASS Server attached.
- This process is not to be confused with the process to back up or restore RAM Data.

H. Data Backup Service

The Data Backup Service provides automatic data backup periodically to a cloud-based server hosted at **Canon Business Imaging Online**. The end-user administrator can execute the Data Backup Service. The Data Backup Service backs up the imageRUNNER ADVANCE third Generation device user mode settings, Address Book, Registration Settings, Quick Menu Settings, Main Menu Settings, Box Settings, Universal Data Settings, Personal Settings, and Service Mode Settings. Customer data is not backed up to the Data Backup Service, the exception is the Address Book.

The service technician can restore the address book and settings listed above from the cloud based server to the existing or replaced Hard Disk Drive of the imageRUNNER ADVANCE DX device.

Training is required to allow the servicing dealer to enroll in Data Backup Service and for the service technician to receive support from the Technical Support Center. Refer to the Training Center at Canon USA's [e-Support Center Website](#) Training Center for details.

I. Firmware Upgrade

The imageRUNNER ADVANCE DX C7700 Series devices supports firmware downloads from the SST (Service Support Tool), USB memory stick and the Content Delivery System. Refer to the imageRUNNER ADVANCE DX C7700 Service Manual for details.

1. Service Support Tool

The Service Support Tool ⁵⁸ (version 4.81 or later) provides a graphical interface between the PC and the copier. Refer to the SST User Manual. The SST is available via Canon's [e-Support Center Website](#) and provides two main functions:

a. Flash Upgrade Function

The SST can upgrade the Flash Dual In-Line Memory Modules (FDIMM) firmware, BootROM, DCON and RCON. The SST is also capable of downloading to a HDD System, RUI (Remote User Interface), Key, SDICT, TTS, Browser, ASR, WebDAV, Media, Help and Language Files. Additionally, the SST can format a HDD and load software.

The SST Download Progress Monitor⁵⁹ is available via the Canon USA [e-Support Center Website](#). The tool will enable the service technician to monitor the download progress of firmware to device.

b. Backup / Restore RAM Data

If replacing any PCBs with FDIMMs attached or initializing RAM, the SST can be used to create a backup of the FDIMM RAM data and saved to a PC. Once the PCB has been replaced, the RAM backup file can be restored to the imageRUNNER ADVANCE DX device and factory settings restored.

2. Content Delivery System

The CDS is Canon's next generation system for the delivery and installation of firmware to imageRUNNER ADVANCE DX devices with the imagePASS Server attached. Refer to the [Content Delivery System](#), page 62.

IMPORTANT

Content Delivery System only supports TLS V1.2 and earlier.

⁵⁸ Check the e-Support Center Download Center for the most current version of the Service Support Tool

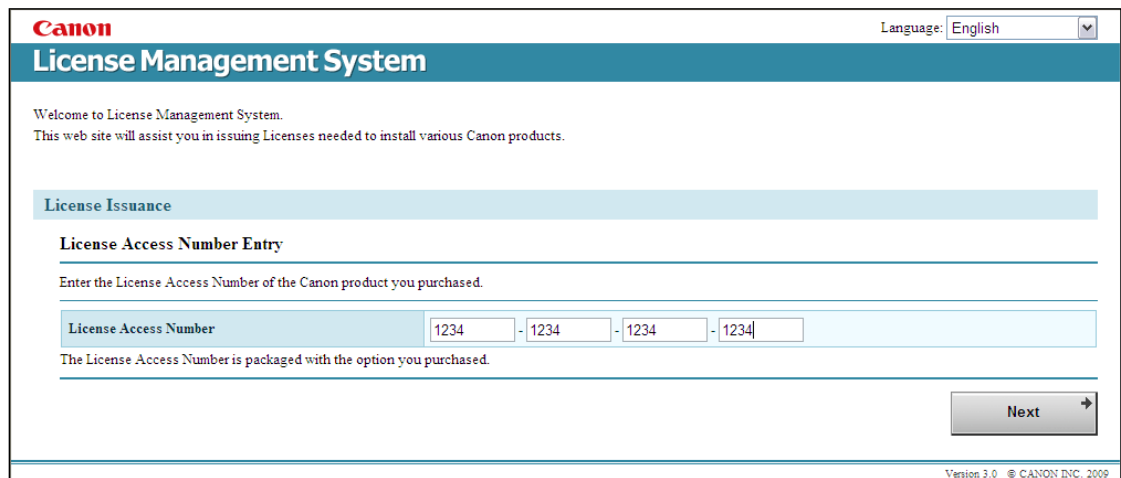

⁵⁹ Check the e-Support Center Download Center for the most current version of the SST Download Progress Monitor.

J. LMS (License Management System)

To activate optional software programs and features preinstalled on the imageRUNNER ADVANCE DX device, you must obtain a license through the LMS server. This replaces the need for additional hardware or dongles to activate new software.

The LMS is a server-based software license program. All purchased software application packages contain a license access number certificate with the documentation. The dealer must enter the license access number and the imageRUNNER ADVANCE DX device’s serial number into the LMS server to generate a license key. The URL to access the LMS server is: <http://www.canon.com/lms/ir/>.

Figure 4 – License Management System

If there are activation or installation issues, contact the Technical Support Center. Be prepared to provide the product’s serial number, license access number, and license key.

IMPORTANT

The License Management System only supports TLS V1.2 and earlier.

Notes:

- The license access number comes with the software. Keep the license access number in a secure location, as it cannot be replaced if it is lost.
- The machine’s serial number can be found on the Counter Check screen on the machine’s UI.
- Activated software programs are not impacted by normal service activity.

K. Content Delivery System Website

The CDS Website (<http://www.canon.com/fau/downloads>) enables end-users to download, select client applications and related manuals.

L. Hard Disk Drive Handling

The imageRUNNER ADVANCE DX C7700 Series machines use a HDD (Hard Disk Drive) for storing firmware and image data. The HDD is easily affected by shock, vibration, and static charge. Therefore, its handling requires special care. When transporting an HDD, which is available as a service part, it must be kept in its original package until it is installed in a machine.

CAUTION

Canon USA or any of its affiliates or dealers are not liable for any damages for loss of data received or stored on the hard disk, including loss arising from lost opportunity to use such data, even if Canon is informed of the possibility of such damages. Therefore, it is recommended to not permanently store data on the HDD without having secured copies or printouts of such data. (Review the terms of the product's Limited Warranty for more details.)

IMPORTANT

If a HDD must be replaced due to a fault, all MEAP application files stored on it will be lost, requiring all applications and their license files to be reinstalled, in addition to replacing the HDD. Refer to the *imageRUNNER ADVANCE DX C7700 Series Service Manual* for further details.

M. Special Tools, Solvents & Oils

In addition to the standard tools used to service these devices, a service technician should also carry special tools to maintain the machine. The service technician should carry specific solvents and oils for the cleaning and lubrication of key components of the machine. For more information on the special tools, solvents, and oils, see the imageRUNNER ADVANCE DX C7700 Series Service Manual.

N. Consumables

Consumables are all products and materials that are consumed with regular use and cannot be reused. Such consumables include but are not limited to paper, chemicals and toner.

A number of factors are considered when the approximate yield expectancy of a consumable is determined, including paper size and the amount of coverage per page.

Note: All consumables shown in the below tables are estimates for reference purposes only and are subject to change without notice. Actual usage will vary.

1. Toner

These models contain logic (a default setting) to help the dealer control costs by only allowing a toner bottle to be replaced by the end-user customer when approximately 5% of its content remains. However, this can be disabled in Service Mode thereby allowing replacement of a bottle at any time by the end-user customer. Please see the Service Manual for details.

Table 27 – GPR-56 Toner

Description	Part Number ²	Quantity	Estimated Life ⁶⁰	Remarks
GPR-56 Black Toner	0998C003AA	1	82,000 ⁶¹ images	Based on - 5% Toner Coverage Ratio - 100% Color Ratio - 0% Large Ratio
GPR-56 Cyan Toner	0999C003AA	1	66,500 ⁶¹ images	
GPR-56 Magenta Toner	1000C003AA	1	66,500 ⁶¹ images	
GPR-56 Yellow Toner	1001C003AA	1	66,500 ⁶¹ images	

² Part numbers are subject to change without notice.

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

⁶¹ Estimated 5% toner coverage on LTR sized paper.

2. Drum

Table 28 – GPR-56 Drum Unit

Description	Part Number ²	Quantity	Estimated Life ⁶⁰			Remarks
			imageRUNNER ADVANCE DX			
			C7780i	C7770i	C7765i	
GPR-56 Black Drum Unit	1110C003AA	1	870,000 pages	856,000 pages	812,000 pages	imageRUNNER ADVANCE DX C7780i Based on an Average Monthly Print Volume of 30,000 pages and Color Ratio of 60%
GPR-56 Color Drum Unit	1111C003AA	3	325,000 pages	304,000 pages	282,000 pages	imageRUNNER ADVANCE DX C7765i Based on an Average Monthly Print Volume of 15,000 pages and Color Ratio of 45%

² Part numbers are subject to change without notice.

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

O. Consumable Parts

Consumable parts are parts having a limited life that will be reached during a customer’s specific machine operation, and should then be replaced as needed. Examples of consumable parts include, but are not limited to, feed rollers and cleaner blades.

An estimated consumable parts list is provided in the table below to assist in the initial parts/supplies planning. A consumable part’s life expectancy is directly related to usage factors, such as paper size, paper quality, environment, usage application, and machine maintenance. Therefore, consumable parts do not have a warranty, and Canon USA cannot guarantee a minimum life.

Note: All consumable parts shown in the table below are for reference purposes only, and are subject to change without notice.

Table 29 – Main Unit Consumable Parts

Description	Part Number ²	Quantity	Estimated Life ⁶⁰	Remarks
Developing Assembly (Bk)	FM1-P092-000	1	900,000 pages ⁶²	Specified by the number of sheets on a A4 size basis
Developing Assembly (Y)	FM1-P089-000	1	900,000 pages ⁶²	
Developing Assembly (M)	FM1-P090-000	1	900,000 pages ⁶²	
Developing Assembly (C)	FM1-P091-000	1	900,000 pages ⁶²	
Drum Cleaning Blade (Bk)	FC8-2281-000	1	750,000 pages	Specified by the Running Distance in Charged State
Drum Cleaning Scoop-up Sheet (Bk)	FL2-8652-000	1	750,000 pages	
Front Edge Scraper (Bk)	FL2-8653-000	1	750,000 pages	
Rear Edge Scraper (Bk)	FL2-8654-000	1	750,000 pages	
ITB	FM1-P695-000	1	740,000 pages ⁶²	Specified by the number of sheets on a A4 size basis
ITB Cleaning Blade	FL1-7724-000	1	370,000 pages ⁶²	
Primary Transfer Roller (Y/M/C/Bk)	FC0-2331-000	4	740,000 pages ⁶²

C-fold stopper solenoid	FK2-4587-000	1	3,000,000 sheets	
flapper solenoid	FM3-2290-000	1	3,000,000 sheets	

² Part numbers are subject to change without notice.

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

Table 40 – Multi Function Professional Puncher-B1 Consumable Parts List

Description	Part Number ²	Quantity	Estimated Life ⁶⁰	Remarks
Solenoid module	FC3-6959-000	6	5,000,000	Replacement

² Part numbers are subject to change without notice.

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

P. Fixing Unit Assembly

As an option, Canon USA has made available Main Engine Fixing Unit for replacement as single units. The Fixing Unit consist of consumable and periodically replaced parts.

These assemblies are designed to be replaced by the service technician only in extreme circumstances where replacing consumable and periodically replaced parts of the Fixing Unit does not correct print quality issues.

Table 41 – Fixing Unit

Fixing Unit			
Item	Part Number ²	Quantity	Remarks
Fixing Unit (200V)	FM1-N744-000	1	imageRUNNER ADVANCE DX C7780i
Fixing Unit (100V)	FM1-N743-000	1	imageRUNNER ADVANCE DX C7770i/C7765i

² Part numbers are subject to change without notice.

Q. Periodically Replaced Parts

Some parts of the machine must be maintained and replaced periodically to ensure a specific level of machine performance. These parts can affect the performance of the machine once they fail, even if there is no external change or damage. Whenever possible, plan to replace these parts during a scheduled service visit.

Table 42 – Main Unit Periodically Replaced Parts

Main Unit Periodically Replaced Parts List				
Description	Part Number ²	Quantity	Estimated Life ⁶⁰	Remarks
Fixing Dustproof Filter	FL0-7931	1	600,000 pages	Estimated life based on letter size paper
Ozone Filter	FL0-7930	1	600,000 pages	
Primary Charging Dustproof Filter	FL2-0439	1	600,000 pages	
Primary Charging Assembly	FM1-L382	1	1,400,000 pages	
Pre-transfer Charging Assembly	FM0-1464	1	1,400,000 pages	
Primary Charging Wire Unit	FL2-8915	1	400,000 pages	Specified by the running distance in charged state
Primary Charging Wire Cleaning Pad Slider	FL2-7750	1	400,000 pages	
Primary Charging Wire Cleaning Pad Holder	FL3-7560	1	400,000 pages	
Pre-transfer Charging Wire Unit	FL2-8807	1	400,000 pages	
Pre-transfer Charging Wire Cleaning Pad Slider	FL2-7750	1	400,000 pages	
Pre-transfer Charging Wire Cleaning Pad Holder	FL3-7560	1	400,000 pages	
Grid Plate	FC0-9857	1	400,000 pages	
Grid Cleaning Pad	FL3-4090	1	400,000 pages	

R. Periodic Maintenance

Some parts of the machine must be checked and/or replaced on a periodic basis to ensure a specific level of machine performance. These parts are likely to affect the performance once they fail even in the absence of external change or damage. Whenever possible, plan their replacement so that it will coincide with a scheduled service visit.

Note: All periodic maintenance shown in the below table is for reference purposes only and are subject to change without notice. Refer to the Service Manual for additional information.

Table 43 – Main Unit Periodic Maintenance Items

Main Unit Periodic Maintenance			
Part Name	Estimated Interval ⁶⁰		Remarks
Developing Assembly Cover (Color)	When Photosensitive Drum Unit (Color) is replaced	Clean	
Developing Assembly Cover (Black)		Clean	
Pre-fixing Feed Belt	When Secondary Transfer Outer Roller is replaced	Clean	When Needed
Post-secondary Transfer Sensor		Clean	
Registration Sensor		Clean	
Paper Width Sensor		Clean	
ITB Drive Roller	When ITB/Secondary Transfer Inner Roller is replaced	Clean	
ITB Steering Roller		Clean	
Post Upper Duct	When Pre-transfer Charging Wire is replaced	Clean	
Shield Plate (Primary Charging Assembly)	When the Primary Charging Wire is replaced	Clean	
Shield Plate (Post Charging Assembly)	When Pre-transfer Charging Wire is replaced	Clean	
Developing Assembly Lower Toner Receptacle	When Photosensitive Drum Unit (Black) is replaced	Clean	
Catch Sheet	When the Photosensitive Drum Unit (Color) is replaced	Clean	
Drum Heater Sliding Assembly	When Photosensitive Drum Unit (Black) is replaced	Clean/ Lubricate	
IH Unit	When the Fixing Film is replaced	Clean	
Fixing Inlet Guide		Clean	When Needed
Feed Guide	When Secondary Transfer Outer Roller is replaced	Clean	When Needed
Feed Roller/Roller		Clean	When Needed
Leakage Breaker	Once or twice / year	Inspect	

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

Table 44 – Reader / ADF Periodic Maintenance Items

Main Unit Periodic Maintenance			
Part Name	Estimated Interval ⁶⁰	Maintenance Task	Remarks
Reader			
Front and back sides of Copyboard Glass (Large)	As necessary	Clean	Clean when soiling is remarkable (including the back side White Plate)
Front and back sides of Copyboard Glass (Small)	As necessary	Clean	Clean when soiling is remarkable
Scanner Mirror (1 st to 5 th)	As necessary	Clean	
ADF			
Post-Separation Sensor	As necessary	Clean	Performed as needed during a visit for parts replacement.
Registration Roller	As necessary	Clean	
Lead Roller 1	As necessary	Clean	
Lead Roller 2	As necessary	Clean	
Delivery Roller	As necessary	Clean	
Pullout Roller	As necessary	Clean	
Rollers / Slave Roller	As necessary	Clean	
ADF height adjustment	As necessary	Adjust	
Original Tray Sensor	As necessary	Clean	
Double Feed Sensor (Transmission side)	As necessary	Clean	
Double Feed Sensor (Reception side)	As necessary	Clean	

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

Table 45 – POD Deck Lite-C1 / Paper Deck Unit-E1

Main Unit Periodic Maintenance			
Part Name	Estimated Interval ⁶⁰	Maintenance Task	Remarks
Pullout Path Roller/Roller	As necessary	Clean	Shorten the interval when coated paper is used continuously.
Pickup Roller	As necessary	Clean	
Feed Roller	As necessary	Clean	
Separation Roller	As necessary	Clean	

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

Table 46 – Staple Finisher-X1 / Booklet Finisher-X1 / Staple Finisher-AC1 / Booklet Finisher-AC1 Periodic Maintenance Items

Main Unit Periodic Maintenance			
Part Name	Estimated Interval ⁶⁰	Maintenance Task	Remarks
Photo Sensor	As necessary	Clean	
Rollers	As necessary	Clean	

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

Table 47 – Document Insertion Unit-N1

Main Unit Periodic Maintenance			
Part Name	Estimated Interval ⁶⁰	Maintenance Task	Remarks
Insertion Separation roller	40,000 sheets	Clean	
Insertion Pickup roller	40,000 sheets	Clean	
Insertion Pick roller	40,000 sheets	Clean	

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

Table 48 – Paper Folding Unit-J1

Main Unit Periodic Maintenance			
Part Name	Estimated Interval ⁶⁰	Maintenance Task	Remarks
Path Reflection Sensor Mirror	The machine's minimum maintenance interval. (At 4 locations)	Clean	Number of sheets actually fed through paper folding unit
Fold Roller	200,000 sheets	Clean	

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

Table 49 – Multi Function Professional Puncher-B1

Main Unit Periodic Maintenance			
Part Name	Estimated Interval ⁶⁰	Maintenance Task	Remarks
Punch drive cams	1,000,000 sheets	Inspect / Lubricate	Lubricated with grease
Punch motor belt	1,000,000 sheets	Inspect	
Alignment stepper belt	1,000,000 sheets	Inspect	
Steering carriage belt	1,000,000 sheets	Inspect	
Steering rollers	1,000,000 sheets	Inspect / Clean	
Punch clutch	1,000,000 sheets	Clean	
High speed sensors	500,000 sheets	Clean	Air blow
Drive and Idler rollers	1,000,000 sheets	Inspect / Clean	Alcohol & cloth
Solenoid module	1,000,000 times	Inspect	
Paper path sensors	500,000 sheets	Clean	Air blow
Idler panel closing magnet latches	1,000,000 sheets	Inspect	
Acceleration panel latch	1,000,000 sheets	Inspect	
Paper path drive timing belts	1,000,000 sheets	Inspect / Adjust	
Diverter solenoid assembly	1,000,000 sheets	Inspect	
Die set recognition board clips	1,000,000 sheets	Clean	
Standard Punch Die (Pin)	250,000 times	Inspect / Lubricate	Maintenance by users Lubricated with oil
High durability punch die (pin)	250,000 times	Inspect / Lubricate	
High durability punch die (shoulder bolt)	750,000 times	Inspect / Lubricate	Maintenance by users Lubricated with grease

⁶⁰ Value is based on LTR sized paper. Estimated average values in the field, based on data from supplier. Data is subject to change depending upon many factors including, without limitation, monthly copy volume, environment, type of image printed and customer handling of the equipment.

S. Soft Counter

The imageRUNNER ADVANCE DX C7700 Series uses soft counters to track its functional copy use. The control panel can display up to eight (8) counters on the counter status check screen (when the counter check key button on the control panel is pressed). By default, the imageRUNNER ADVANCE DX C7700 displays six (6) counters on the counter status check screen.

The Table below indicates the default counter configurations of the imageRUNNER ADVANCE DX C7700 Series on the counter status check screen.

Refer to the imageRUNNER ADVANCE DX C7700 Series Service Manual for complete details on the Soft Counter configurations.

Table 50 – Soft Counter

Counter	Counter Description (from Service Manual)	Default Display	Adjustability of Display
1	101: Total 1	On	May be Swapped to different Total Counter via Service Mode setting so that the counter will increment twice when large paper is used
2	108: Total (Black 1)	On	May be Changed via Service Mode setting to any available counter
3	229: Copy (Full Color + Single Color/Large)	On	
4	230: Copy (Full Color + Single Color/Small)	On	
5	321: Print (Full Color + Single Color/Large)	On	
6	322: Print (Full Color + Single Color/Small)	On	
7	Not Displayed	Off	
8	Not Displayed	Off	

⚠ CAUTION

- After performing a RAM clear, the counter will change to the default counter configurations above. As a result, the service technician must note the current soft counter settings before performing the RAM clear and return the soft counter settings after performing the RAM clear.
- If Counter 1 is changed to display the 102 counter (count two (2) clicks for large paper), Counter 2 may need to be changed to display the 109 counter (count two (2) clicks for large B&W paper) to match. However, you may need to confirm how your backend billing system and service history obtains the volume of color outputs before making this change.

T. MEAP Counter

The MEAP application counter counts the number of prints and scans made per MEAP application. You can view the MEAP counter by logging on to the MEAP SMS (Service Management Service) Application/License Information page via a Web browser. (The computer you are using must be connected to the machine and network.) You can also view the MEAP counter from the MEAP device. Press the Counter Check button on the device's control panel, and then press the MEAP Counter key on the touch panel display.

There are three types of MEAP applications:

- **Applet:** Contains a user interface on the touch panel display of the device. Up to nine applet tabs can be displayed on the touch panel display of the device.
- **Servlet:** Contains a remote, programmable user interface for the application via a Web browser.
- **Esplet:** The application does not contain a user interface.

Each MEAP application has its own counter. There are 20 counters available for MEAP applications on the imageRUNNER ADVANCE Series machines. However, one of these 20 counters is used for Universal Send.

U. Toner Bottle Counter

The imageRUNNER ADVANCE machine has Toner Bottle Counters that increment after the machine recognizes that a new toner bottle has been inserted. These counters provide support when billing customers who order and consume a lot of toner. Toner units shipped can be compared against toner bottles actually installed in the machine.

For more information, refer to the Service Manual.

Table 51 – Toner Bottle Counters

	Toner Bottle Counter⁶³	Premature Removal Counter⁶³	Unidentified Toner Bottle Counter⁶³
Counter Number	Black: 0071 Yellow: 0072 Magenta: 0073 Cyan: 0074	Black: 0081 Yellow: 0082 Magenta: 0083 Cyan: 0084	Black: 0181 Yellow: 0182 Magenta: 0183 Cyan: 0184
Description	Counts how many toner bottles are consumed for each color throughout the life of the machine.	Counts how many toner bottles are removed prematurely for each color throughout the life of the machine.	Counts how many unidentified toner bottles ⁶⁴ are consumed for each color.
Service Mode	COPIER > OPTION > USER > TNRB-SW (Level 2)		
Display on the Counter Check Screen	0: Not displayed 1: Toner Bottle counter is displayed 2: Not displayed 3: Toner Bottle counter and unidentified toner counter are displayed		
Remarks	Backed up three times		

63 The counter is not advanced under these conditions after replacing the DC Controller PCB:
 - The DC Controller was replaced when the power was OFF, and a new toner bottle was installed before the power was turned ON.
 - The DC Controller was replaced when the power was OFF, the power was turned back ON, and then a new toner bottle was installed (old bottle was already removed or the front door was open).

64 A toner bottle whose IC tag information cannot be read.

IX. Limited Warranty Support

A. imageRUNNER ADVANCE DX C7700 Series Limited Warranty Conditions

Ninety (90) days after delivery to the original purchaser or 90,000 prints/copies, or a combination of both, whichever comes first.

This limited warranty covers the product accessories. For detailed limited warranty information, please refer to the [CANON imageRUNNER ADVANCE DX C7780i/C7770i/C7765i SERIES LIMITED WARRANTY](#), page [132](#).

Note: No warranty is given on any consumables or consumable parts, such as paper, toner, chemicals, or pick-up rollers.

B. GPR-56 Drum Unit Limited Warranty

Table 52 – GPR-56 Drum Unit Limited Warranty

Full Credit:	Black Drum Unit	1,000 prints or copies (or a combination of both) or 30 days after delivery to the original purchaser, whichever comes first.
	Color Drum Unit	1,000 prints or copies (or a combination of both) or 30 days after delivery to the original purchaser, whichever comes first.
Prorated Credit:	Black Drum Unit	370,000 prints or copies (or a combination of both) or 120 days after delivery to the original purchaser, whichever comes first.
	Color Drum Unit	300,000 prints or copies (or a combination of both) or 120 days after delivery to the original purchaser, whichever comes first.

C. Warranty Programs

Reference the Warranty Programs section on the [e-Support Center Website](#) to review details of the following warranty programs and offerings:

- The Flat-Rate Program provides a flat-rate credit to Canon USA’s full-line dealers as compensation for warranty expenses that they may incur.
- Canon USA Authorized Parts Repair Facilities that repair circuit boards for various Canon products.
- The e-Tag, an electronic limited warranty claim form, that is completed online, printed out, and accompanied by the original defective part that is being returned to the Warranty Control Section for warranty compensation
- The Parts Support Program is designed to help reduce your service costs for controllers. By participating in the Parts Support Program your dealership will not be required to stock expensive parts.

D. Service Parts Availability

Service parts ordering will be available 24 hours a day, 7 days a week, 365 days a year to provide the quickest possible response should the need arise for such parts. Canon USA will provide service parts for the key units, assemblies and consumables to cover the entire machine function, and this is designed to avoid potential machine downtime for the customer. Various shipment options⁶⁵ currently offered include:

- Next Flight Out (NFO)
- UPS (Ground, Next Day, Early AM)
- Pickup (Rush, Spot)

Table 53 – Parts Order Center Days and Hours of Operation

Days of Operation	Hours of Operation	Parts Order Center	Telephone Number
Monday – Friday	9:00 AM – 7:00 PM Eastern Standard Time	Canon Parts Order Center	866-481-2569
Monday – Friday ⁶⁶	7:00 PM – 9:00 AM Eastern Standard Time	24 / 7 Call Center	800-263-9271
Saturday – Sunday ⁶⁶ All National Holidays	24 Hours		

⁶⁵ Shipment options are subject to change

⁶⁶ Only authorized dealer personnel with a unique PIN access code will be allowed to utilize this service. Contact the Canon Parts Order Center (canonparts@cusa.canon.com) for more information.

X. Sample Pricing, Potential Gross Profit Ratios, and Costs

This chapter explains the potential profitability of the imageRUNNER ADVANCE DX C7700 Series devices. Potential profitability is based on the total costs to service the device over a three (3) year period, and the pricing set by your dealership.

This chapter includes these topics:

- Device Usage Factors
- The cost to service the imageRUNNER ADVANCE DX C7700 Series devices and accessories
- Sample pricing with an estimated profit margin
- Sample pricing for accessories
- Data sheet
- Methods to reduce cost
- Large Media Consideration

A. Device Usage Factors

The device usage factors are how end-users use the imageRUNNER ADVANCE DX device and the environment in which the device is located. These factors include:

- The maintenance agreement term
- Monthly print/copy volume
- Toner Coverage – The amount of toner that covers each page
- Large Paper Ratio – The amount of Large sheets to letter size sheets
- Attached accessories

Table 54 – imageRUNNER ADVANCE DX C7700 Series Sample Device Usage

	imageRUNNER ADVANCE DX			
	C7780i	C7770i	C7765i	
Maintenance Agreement Term ⁶⁷	36 Months			
Monthly Print/Copy Volume	30,000	30,000	20,000	15,000
Color Sheet Ratio	60%	50%	45%	40%
Large Sheet Ratio	15%	5%	5%	5%
Toner Coverage	6.5%	5.5%	5.5%	5.5%
Print Environment	High Color / Large Ratio	Office		
Accessories	DADF POD Deck Lite-C1 Booklet Finisher-X1	DADF Paper Deck Unit-E1 Staple Finisher-AC1		

⁶⁷ Based on a standard workweek operation of 8 AM to 5 PM, Monday – Friday.

B. Revenue/Cost/Profit Estimation Tools

Canon USA provides our servicing dealers with dynamic tools to help estimate revenue, costs, and profit for Canon devices in addition to the information available in this Service Guide:

1. Service Revenue/Profit Calculator

A tool developed by Canon USA to estimate revenue and costs for a single Canon device.

2. Canon Fleet Simulator

The Canon Fleet Simulator Formerly the Managed Document Services Advanced Profit Simulator is a tool developed by Canon Inc. to estimate revenue and costs for a fleet of Canon and third party devices.

The Service Revenue/Profit Calculator and the Canon Fleet Simulator are Microsoft Excel spreadsheets (specifically Macro-Enabled Workbooks) that enable your dealership to estimate revenue and costs for imageRUNNER products.

Revenue/Cost/Profit Estimation Tools may be used to establish a maintenance agreement rate for a single device, or for a fleet of devices to reflect the service business costs and revenue requirements of your dealership.

These tools enable a dealership to input:

- The expected customer usage conditions
- The estimated business expenses
- Desired pricing to the customer

Based on the input these tools help to estimate:

- The total cost to service a single device or fleet of devices based on the anticipated customer usage
- Profitability based on the estimated costs and revenue

The Revenue/Cost/Profit Estimation Tools are available on the [Canon USA Partner Portal Website](#). The management staff of an authorized dealer (with access to the Service section of the [Canon USA Partner Portal Website](#)) can download the worksheets.

If you experience any problems downloading the Revenue/Cost/Profit Estimation Tools from the [Canon USA Partner Portal Website](#), contact the Canon USA Service Planning Department via e-mail at serviceplanning@cusa.canon.com.

C. Estimated Costs

Estimated costs are calculated using the sample device usage information Table 54 – imageRUNNER ADVANCE DX C7700 Series Sample Device Usage and represent the estimated costs to service and maintain a typical configuration of the imageRUNNER ADVANCE DX device. A typical configuration includes:

- One (1) Main Unit (service parts⁶⁸, drum, labor, and toner),
- imageRUNNER ADVANCE DX C7780i High Color / Large Ratio
 - POD Deck Lite-C1
 - Booklet Finisher-X1
- imageRUNNER ADVANCE DX C7700 Series Office Environment
 - Booklet Finisher-X1
 - Staple Finisher-AC1

IMPORTANT

Estimated costs for service parts, drum, labor, and toner vary, depending on the device use. Use the Service Revenue/Profit Calculator to determine the estimated costs for your customer’s device use.

1. Parts and Drum Cost

The costs of parts and drum units are based on the estimated yield and use of periodically replaced parts, consumable parts, and the drum.

2. Estimated Labor Cost

The labor cost is a calculation using the burdened labor rate to travel to and work on the imageRUNNER ADVANCE DX device.

The burdened labor rate is a calculation of the service technician’s salary, the estimated business overhead expenses, and the direct service expenses required to maintain the business (for example, call center, rent, fuel, tolls, automobile, and training).

To align more closely with the labor costs in various business environments, Canon USA calculates the Estimated Labor cost to service the device using a burdened hourly labor rate⁶⁹ of \$45 per hour and \$60 per hour. The Service Revenue/Profit Calculator is available to set the Burdened Labor Rate according to your business expenses.

The Estimated Labor cost includes a yearly salary increase of 3% in the technician’s salary.

⁶⁸ The estimated parts costs do not include the costs associated with supplying the customer with replacement consumable (merchandise) parts.

⁶⁹ The burdened hourly labor rates used in the calculations are current as of the latest date of this Service Guide and are subject to change without notice.

3. Toner Cost

The device usage determines the cost of toner for an imageRUNNER device. Toner cost calculations are based on the toner coverage for each page, the yield of the toner bottle, and the dealer cost of the toner bottle.

Table 55 – Estimated Cost imageRUNNER ADVANCE DX C7780i High Color / Large Ratio

30,000 Prints/Month	FIRST YEAR	SECOND YEAR	THIRD YEAR	TOTAL (3 Years)	3 Year Average
Estimated Parts Cost ⁷⁰	\$ 236	\$ 737	\$ 1,334	\$ 2,307	\$ 769

⁷⁰ Part and Drum costs vary depending on the type of media used. Estimated Costs are calculated based on 100% plain paper usage. When establishing a pricing plan, consider the media the customer will use. The Service Revenue/Profit calculator is available to estimate costs based on media.

⁷² 100% Regular Toner Bottle usage

D. Sample Pricing

Canon USA offers sample pricing by carefully analyzing the total costs to service the device over a three-year period using the sample device usage in Table 54 – imageRUNNER ADVANCE DX C7700 Series Sample Device Usage. The sample pricing contains examples of pricing, so that dealers can achieve a favorable profit margin over the maintenance agreement term.

 **IMPORTANT**

SAMPLE PRICING IS OFFERED AS AN EXAMPLE ONLY. CANON USA DOES NOT REPRESENT OR WARRANT THAT AN AUTHORIZED DEALER WILL OPERATE AT ANY LEVEL OF PROFITABILITY. CANON USA DOES NOT SET MAINTENANCE AGREEMENT RATES TO BE CHARGED TO CUSTOMERS AND THE AUTHORIZED DEALER IS FREE TO SET ITS OWN RATES.

Sample pricing for the imageRUNNER ADVANCE DX C7700 Series devices is based on the sample device usage and includes costs for:

- One (1) Main Unit (service parts⁷³, drum, labor, and toner)
- imageRUNNER ADVANCE DX C7780i High Color / Large Ratio
 - POD Deck Lite-C1
 - Booklet Finisher-X1
- imageRUNNER ADVANCE DX C7700 Series Office Environment
 - Booklet Finisher-X1
 - Staple Finisher-AC1
- All service visits
- Replacement parts
- Replacement drums
- Replacement toner

 **IMPORTANT**

The Sample Pricing in the tables below represents a fixed pricing throughout the maintenance agreement term; however, if a dealer increases the Color and B&W pricing annually, the dealership may yield a higher profit ratio over the term of the maintenance agreement. By annually increasing the Color and B&W pricing, your dealership may generate revenue to account for an increase in service costs for parts and labor following the first year. Use the Service Revenue/Profit Calculator to determine the estimated costs using your customer’s device use, and to estimate revenue if you increase the pricing annually.

⁷³ The estimated parts costs do not include the costs associated with supplying the customer with replacement consumable (merchandise) parts.

Table 59 – imageRUNNER ADVANCE DX C7780i Sample Pricing/Gross Profit Matrix High Color/Large Ratio

		B&W Sample Pricing	
		\$0.0080	\$0.0100
Color Sample Pricing	\$0.0390	49.2%	50.7%
	\$0.0410	51.4%	52.8%
	\$0.0430	53.4%	54.7%
	\$0.0450	55.3%	56.4%
	\$0.0470	57.0%	58.1%

Accessories	Paper Deck Unit-E1 Staple Finisher-AC1		
Example: A Color click charge of \$0.0510 and a B&W click charge of \$0.0080 may yield an estimated gross profit of 68.1%			

E. Sample Pricing for Accessories

Canon USA offers Sample Pricing for Accessories by carefully analyzing the total costs to service the accessories over a three-year period using the sample device usage in [Device Usage Factors](#). The Sample Pricing is examples of pricing so that our dealers may achieve a favorable profit margin over the maintenance agreement term.

IMPORTANT

- The cost to service the POD Deck Lite-C1 and Booklet Finisher-X1 is already included in the sample pricing for the imageRUNNER ADVANCE DX C7780i in a High Color/Large Ratio environment.
- The cost to service the Paper Deck Unit-E1 and Staple Finisher-AC1 is already included in the sample pricing for the imageRUNNER ADVANCE DX C7700 Series in an office environment.
- Service Revenue/Profit Calculator is available to add estimated costs for select accessories.

Table 63 – Sample Maintenance Agreement Rates for Accessories

Accessory	Suggested Annual Fees
Staple Finisher-X1	\$ 300.00
Booklet Finisher-X1	\$ 450.00
Document Insertion Unit-N1	\$ 250.00
Paper Folding Unit-J1	\$ 700.00
Inner Booklet Trimmer-A1	\$ 300.00
Multi Function Professional Puncher-B1	\$ 750.00
Staple Finisher-AC1	\$ 150.00
Booklet Finisher-AC1	\$ 250.00
Document Insertion Unit-Q1	\$ 150.00
Document Insertion / Folding Unit-K1	\$ 400.00
Paper Deck Unit-E1	\$ 100.00
POD Deck Lite-C1	\$ 200.00
Multi Drawer Paper Deck-C1	\$ 500.00

Table 64 – Print Controller Sample Annual Maintenance Rates

Description	Annual Fee	Monthly Fee
imagePASS-N2 V1.1	\$ 350.00	\$ 35.00

F. Scan Charge Plan

While the DADF of the imageRUNNER ADVANCE DX device is not intended for use as a high volume document scanner, some customers may choose to use the scanner to convert large volumes of data into digital format. This may result in an increase to the cost of parts and labor to service the scanning components of the imageRUNNER ADVANCE DX device. To compensate Canon USA has developed a Scan Charge Plan with sample pricing for scanning.

An indicator that a scan charge plan is required is if there is a high Scan Ratio, the number of scans as compared to one print or copy. The Scan ratio is calculated as: Counter 501 (total scans)/Counter 101 (total print/copies).

Counter 501 is a total counter that increments when one page is scanned. This includes copies, scans, send scans, fax scans, scan to box, and scan to USB.

- The Soft Counter of the device can be configured to display the Counter 501 when the counter check key button on the control panel is pressed. Refer to the Service Manual for complete details on the Soft Counter configurations.
- imageWARE Remote is available to remotely capture both the Counter 101 and Counter 501. This requires a billing system to interface with imageWARE Remote at the dealership site.

Scan Charge Plan is not required if the following conditions exist:

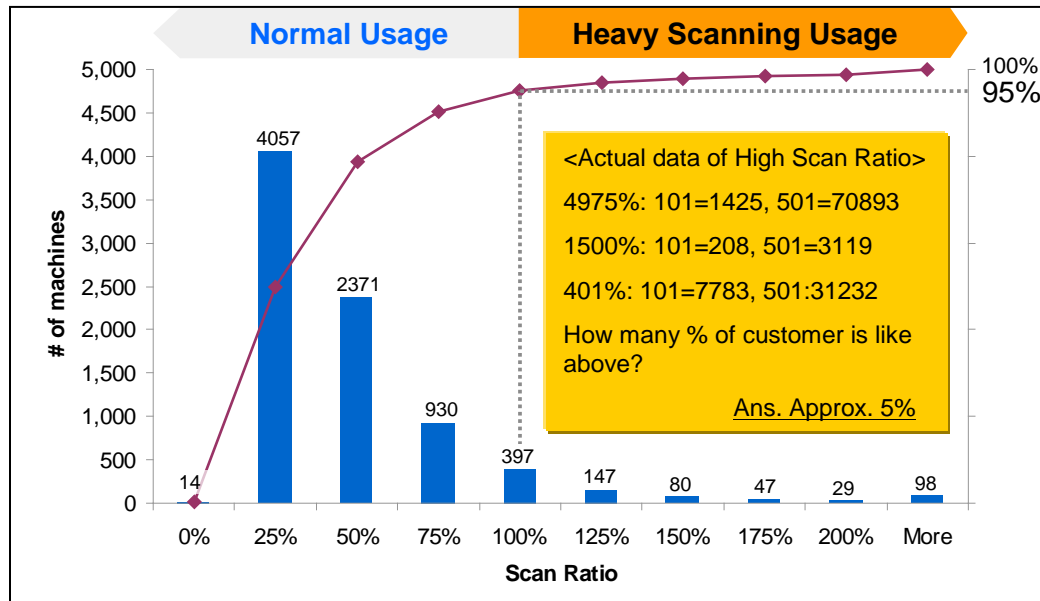

- The Scan Ratio is less than 100%. This indicates that the number of prints and copies exceed the number of scanned pages. In this case, the costs associated with copy scans are offset by the revenue secured from the standard copy click charge.
- Scan service is provided by a print shop. Since Counter 501 captures the meters for both copy scans and scans without paper output, a scan only count cannot be captured and used separately.
- The machine is in a low print volume environment. A Scan Charge Plan is not designed to compensate for revenue reductions that may occur in low copy/print volume environments.

Table 65 – Scan Ratio Example

Example	Counter 101	Counter 501	Scan Ratio	Comments
1	1,000	1,000	100%	One (1) scan for every print. A Scan charge plan is not recommended.
2	1,000	5,000	500%	Five (5) scans for every print. A Scan charge plan is recommended.
3	1,000	250	25%	One (1) scan for every four (4) prints. A Scan charge plan is not recommended.

Figure 5 below indicates that approximately 95% of devices have a scan ratio of 100% or less. Therefore, approximately 5% of devices have a scan usage greater than 100%. Canon USA recommends a Scan Charge Plan for these devices.

Figure 5 – Scan Ratio Distribution Chart

1. Scan Charge Plan Options

Canon USA recommends a Base Charge Plan or a Per Click Scan Charge Plan to collect revenue for high volume scanning:

- **Base Charge Plan** – If a Base charge is used in the maintenance agreement rate for prints and copies, the price for high volume scanning can be included in the base charge.
- **Per Scan Charge Plan** – A per scan charge plan to collect revenue for each scan of the device that is not related to a copy scan.

Note: a soft counter is not available to capture scans only or extract scans from the copy scan meter included in Counter 501. Therefore, Canon USA recommends subtracting the value of Counter 101 from Counter 501. Since Counter 101 includes the total amount of prints and copies made, subtracting this value from the Counter 501 value yields a result that most closely represents the number of documents scanned.

Table 66 – Suggested Per Scan Charge

Per Scan Sample Pricing	\$0.0015
The Per Scan Charge includes Consumable/Accidental parts and labor costs related to the Reader and the DADF.	
Billing Method	(Counter 501 minus Counter 101) multiplied by \$0.0015

2. Recommendations to Include a Scan Charge Plan

- When devices are being replaced for an existing customer, scan usage for the new device can be estimated based on past device records. A Scan Charge Plan can be initiated upon a service contract sign up.
- Regardless of the scan ratio, implement a Scan Charge Plan upon the initial service contract sign up. Include terminology in the service contract, such as “If the Scan Ratio exceeds 100%, a scan charge will apply.” Alternatively, “If the Scan Ratio exceeds 100%, a scan charge will apply upon service contract renewal in the second year.” This will require your dealership to monitor the scan usage monthly.

G. Data Sheets

The Data Sheets below are what Canon USA uses to calculate a dealer's estimated costs, pricing, and profit margins using the sample device usage and business expense. The Service Revenue/Profit Calculator is available to adjust the Device Usage, Pricing, and Business Expense to reflect your customer's usage as well as your pricing and business expense.

IMPORTANT:

SERVICE PERFORMANCE DATA, SUCH AS WORKING TIME AND VISIT RATIO SHOWN BELOW, REPRESENT THE ESTIMATED AVERAGE FOR A FIVE-YEAR PERIOD. PERFORMANCE DATA FOR THE FIRST YEAR (FROM THE FIVE-YEAR AVERAGE) MAY FALL BELOW ESTIMATES.

ESTIMATES SHOWN ASSUME ADHERENCE TO CANON U.S.A., INC'S PUBLISHED SERVICE PROCEDURES AND THE USE OF GENUINE CANON PARTS AND MAY VARY.

PERIODIC MAINTENANCE MUST BE PERFORMED AT THE RECOMMENDED INTERVALS. FAILURE TO DO SO COULD RESULT IN SERVICE NEEDS IN EXCESS OF THESE ESTIMATED LEVELS.

Table 67 – Data Sheet

	Details	imageRUNNER ADVANCE DX			
		C7780i		C7770i	C7765i
Device Usage Factors	Monthly Print Volume (Approximately)	30,000 sheets		20,000 sheets	15,000 sheets
	Print Volume over a Three (3) Year Maintenance Agreement (Approximately)	1,080,000 sheets		720,000 sheets	540,000 sheets
	Color Ratio	60%	50%	45%	40%
	Large Ratio	15%	5%	5%	5%
	Toner Coverage for Each Color	6.5%		5.5%	
	Print Environment	High Color/ High Large		Office	
	Configuration	<ul style="list-style-type: none"> • Main Unit • Booklet Finisher-X1 • POD Deck Lite-E1 		<ul style="list-style-type: none"> • Main Unit • Staple Finisher-AC1 • Paper Deck Unit-E1 	
Labor	Working Time [Minutes/Visit] (Average amount of time a service technician needs to service the machine. This number may vary, based on the service technician's experience and the service required during each site visit.)	66 Minutes			
	Travel Time [Minutes/Visit] (Average amount of time a service technician takes to travel from site to site. This number may be higher or lower based on the local service map.)	35 Minutes			
	Estimated Technician's Annual Working Hours [Hours/Year] (Estimated number of active working hours annually, factoring in holidays, and breaks)	1,674 Hours			
Service	Average Copies Between Visits (CBV) (The estimated number of total sheets between service visits. The CBV takes into account all service visits throughout the term of the maintenance agreement. The actual CBV may vary based on the MCV, Large Paper Ratio, and service required. The CBV is calculated via Quality Assurance testing and careful consideration of the actual average CBV of the predecessor model with the improvements added to the current model.)	45,995 Sheets	50,620 Sheets	51,523 Sheets	50,729 Sheets
	Visit Ratio [Visits/Month] [MCV divided by the CBV] The Visit Ratio is calculated as the MCV divided by the CBV. This displays the estimated number of visits per month.	0.65 Visits per Month	0.59 Visits per Month	0.39 Visits per Month	0.30 Visits per Month
	Estimated number of machines a dedicated technician can manage [Machines/Technicians]. (Calculated as a single technician assigned to service only this product, and factors in the Labor and Service components, shown above.)	127	140	213	280

H. Methods to Reduce Costs

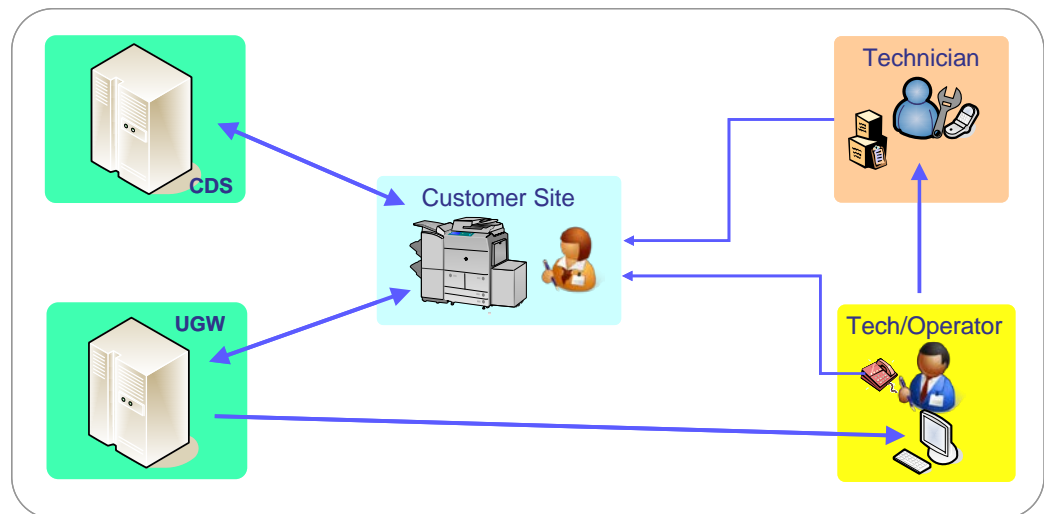

1. Canon Remote Services

Canon USA strongly recommends that dealers consider introducing Canon Remote Services as a method to increase a technician’s performance and reduce labor costs. Canon Remote Services are service support tools that can remotely monitor machine issues and usage through the Internet.

Canon Remote Services provides you with the following benefits:

- Investigate machine issues by monitoring the details of, for example, a paper jam error, before visiting the customer site. This enables the service technician to visit the customer with the necessary parts in advance, thereby, reducing the number of times the service technician may have to revisit the site due to the unavailability of service parts.
- Simple issues can be resolved over the phone, which reduces the need for an on-site service visit.
- Firmware downloads and installation via the CDS can be performed, which reduces the need for an on-site firmware upgrade.

Figure 6 – Canon Remote Services Benefits

Canon USA estimates that if a dealership fully uses imageWARE Remote with the CDS, the dealership can benefit with reduce labor costs by approximately 10%. In response to the labor cost reductions, the estimated gross profit will improve by approximately two points. For example, consider the imageRUNNER ADVANCE DX C7780i with a click charge set at \$0.0470 for color and \$0.0080 for B&W).

Figure 7 – imageRUNNER ADVANCE DX C7700 Series Click Charge Example

2. Aftermarket Program Credits

The Canon Aftermarket Products Group offers various programs that provide credit on toner, parts and supplies based on one or more qualifying factors related to the business and/or the device.

The Service Revenue/Profit Calculator can be used to estimate the costs savings based on the anticipated credit (manual input required). An estimated discount on the cost of toner, parts and supplies will appear immediately in the estimated costs.

Refer to Canon USA Aftermarket Products Division for program details.

I. Large Media Considerations

If media larger than Letter size (typically 11” x 17” or larger) is used, a higher toner consumption can be expected as well as a reduction in parts yield. When estimating the service costs for this machine, the extent of Large Paper Size usage or toner coverage must be carefully considered.

Canon USA suggests, where possible, dealerships utilize a double click plan to secure a satisfactory profit ratio regardless of the increased large paper usage.

XI. Product Technical Support Offerings

Note: Please refer to the Technical Support Center on the [e-Support Center Website](#) for the most current policies and procedures.

A. Canon USA Technical Support Center

The Technical Support Center (TSC) is the single point of entry for all technical support issues on BICG products. To ensure that every dealer receives the highest level of support and help to resolve the end user's problems quickly and accurately, we recommend each service technician become familiar with the Dealer Support requirements and Canon USA support offerings.

Refer to the Tech Support tab of the [e-Support Center Website](#) and review the Technical Support Center Policies and Procedures as well as Contacts & Tickets.

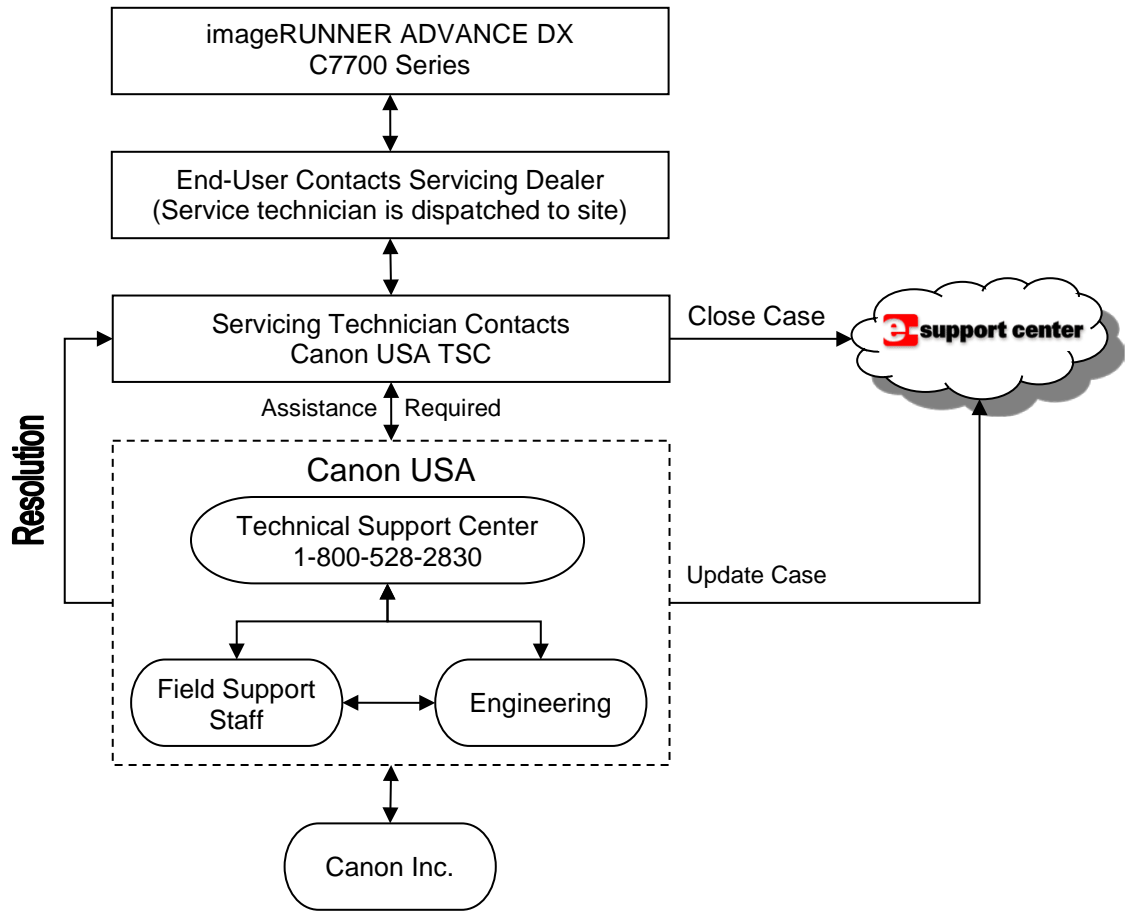

B. Technical Support Escalation

The TSC may, at its discretion, escalate a case to the Regional Field Support Staff or Engineering group after all reasonable troubleshooting options have been exhausted. For hardware-related issues a Designated Escalation Specialist for the imageRUNNER ADVANCE Series is required for an escalation to Field Support Staff. The DES must have worked on the problem directly before a TSC can escalate to Field Support Staff. See the Canon USA Support Escalation Flow Chart in [Figure 8 – Canon USA Support Escalation Flow Chart](#).

Note: For support escalation to the Field Support Staff, a Designated Escalation Specialist ⁷⁴ must contact the TSC and visit the site at least once.

⁷⁴ The Designated Escalation Specialist is a service technician assigned by the dealership in the model category of the imageRUNNER ADVANCE via the Management Center of the e-Support Website. The Designated Escalation Specialist must complete the training program and pass the final assessment exam for the imageRUNNER ADVANCE Series. See the Technical Support Center on the e-Support Center Website for more details.

Figure 8 – Canon USA Support Escalation Flow Chart

C. Internet Support

Canon USA's Engineering Services and Solutions Division provides high-quality e-Support via the Internet, and is only available for Canon USA's Authorized Servicing Dealers.

1. Canon USA's e-Support Center Website

To access e-Support, go to the Canon USA's [e-Support Center Website](#).

Canon USA's e-Support is designed to provide Systems Engineers and Technicians access to technical support information via the World Wide Web.

The following functions and information can be accessed:

- Proactive notification of new releases, patches, Technical Publications, and other information via e-mail message
- Search for technical solutions with the Integrated Knowledge Management System through a natural language query
- Read or download on-line documentation
- Download patches and their Readme files
- Download firmware and software drivers
- Track or close logged cases
- Review all open cases

2. Canon USA's Partner Portal Website

Canon USA's [Partner Portal](#) provides links to BICG Marketing and Service, Canon Network Access and the Learning Zone.

The Service and Support link provides access to view and download Service Guides, Customer Expectation Documents and Service Revenue/Profit Calculators.

Access is limited to an Authorized Dealer's Management staff. Please contact your Dealer Administrator to request access to the Partner Portal.

XII. Appendix

A. Registered Paper Types and Weight

Table 68 – Registered Paper Types and Weight

Paper Type	Paper Weight
Thin 2	14 to 15 lb bond (52 to 59 g/m ²)
Thin 1	16 lb bond (60 to 63 g/m ²)
Plain 1	17 to 20 lb bond (64 to 75 g/m ²)
Plain 2	21 to 24 lb bond (76 to 90 g/m ²)
Plain 3	25 to 28 lb bond (91 to 105 g/m ²)
Heavy 1	29 to 34 lb bond (106 to 128 g/m ²)
Heavy 2	35 to 40 lb bond (129 to 150 g/m ²)
Heavy 3	56 to 60 lb cover (151 to 163 g/m ²)
Heavy 4	61 to 66 lb cover (164 to 180 g/m ²)
Heavy 5	67 to 80 lb cover (181 to 220 g/m ²)
Heavy 6	82 lb cover to 140 lb index (221 to 256 g/m ²)
Heavy 7	100 to 110 lb cover (257 to 300 g/m ²)
Recycled 1 ⁷⁵	17 to 20 lb bond (64 to 75 g/m ²)
Recycled 2 ⁷⁵	21 to 24 lb bond (76 to 90 g/m ²)
Recycled 3 ⁷⁵	25 to 28 lb bond (91 to 105 g/m ²)
Pre-Punched 1	17 to 21 lb bond) (64 to 81 g/m ²)
Pre-Punched 2	21 to 24 lb bond (76 to 90 g/m ²)
Transparency ^{76, 77}	25 to 66 lb cover (91 to 180 g/m ²)
Labels	31 lb bond to 68 lb cover (118 to 185 g/m ²)
Tab 1 ⁷⁸	25 to 28 lb bond (91 to 105 g/m ²)
Tab 2 ⁷⁸	29 to 34 lb bond (106 to 128 g/m ²)
Tab 3 ⁷⁸	35 lb bond to 66 lb cover (129 to 180 g/m ²)
Tab 4 ⁷⁸	67 to 80 cover (181 to 220 g/m ²)
Color 1	17 to 21 lb bond) (64 to 81 g/m ²)
Color 2	21 to 24 lb bond (76 to 90 g/m ²)
Letterhead	56 to 66 cover (151 to 180 g/m ²)
Bond	21 to 28 lb bond (76 to 105 g/m ²)

⁷⁵ You can use 100% recycled paper.

⁷⁶ Use only LTR or LTRR transparencies made especially for this machine.

⁷⁷ The Multi Function Professional Puncher-B1 does not support punching OHP/transparent media.

⁷⁸ Use Only LTR size paper.

Table 68 – Registered Paper Types and Weight Continued

Paper Type		Paper Weight
Tracing ^{79, 80}		17 to 24 lb bond (64 to 90 g/m ²)
1-Sided Coated ⁸⁰	1	29 to 34 lb bond (106 to 128 g/m ²)
	2	35 to 40 lb bond (129 to 150 g/m ²)
2-Sided Coated ⁸⁰	3	56 to 60 lb cover (151 to 163 g/m ²)
	4	61 to 66 lb cover (164 to 180 g/m ²)
Matte Coated ⁸⁰	5	67 to 80 lb cover (181 to 220 g/m ²)
Textured ⁸⁰	6	82 lb cover to 140 lb index (221 to 256 g/m ²)
	7	100 to 110 lb cover (257 to 300 g/m ²)
Envelope		21 to 28 lb bond (76 to 105 g/m ²)
Postcard		67 to 80 cover (181 to 220 g/m ²)

Note: Clear Film can be displayed as a paper type via a Service Mode Setting. See the imageRUNNER ADVANCE DX C7700 Series Service Manual.

 **IMPORTANT**

Clear Film image quality is not guaranteed.

⁷⁹ Some types of tracing paper cannot be used.

⁸⁰ When loading this type of paper in the multi-purpose tray, load only one sheet at a time.

B. Specifications

Note: All specifications are for reference purposes only and are subject to change without notice.

Table 69 – imageRUNNER ADVANCE DX C7700 Series Specifications

Item		Specification		
		imageRUNNER ADVANCE DX		
		C7780i	C7770i	C7765i
Type		Console type		
Resolution for Reading		600 dpi x 600 dpi 600 dpi x 300 dpi 300 dpi x 300 dpi		
Resolution for Writing		Up to 2,400 x 2,400 dpi		
Image Gradation		256		
Acceptable Originals		Sizes of Original ⁸¹ Up to 11 3/4" x 17" (297.0 mm x 431.8 mm) Types of Original Sheet, book, and three dimensional objects Automatically Detectable Sizes of Original ⁸² 11" x 17", LTR, LGL, LTRR, STMT and STMT		
Paper Size	Paper Sizes	Paper Deck: LTR Paper Drawer: Maximum: 13" x 19 1/4" (330.2 x 487.7 mm) Minimum: 4" x 5 7/8" (100 x 148 mm) Multi-Purpose Tray: Maximum: 13" x 19 1/4" (330.2 x 487.7 mm) ⁸³ Minimum: 3 7/8 " x 5 7/8" (90 x 148 mm)		
	Margin	Top: 3/16" (4 mm) Left and Right: 1/8" (2.5 mm) Bottom: 1/8" (2.5 mm)		
	Paper Weight	Paper Deck: 14 lb bond to 80 lb cover (52 to 220 g/m ²) Paper Drawer: 14 lb bond to 140 lb index (52 to 256 g/m ²) Multi-Purpose Tray: 14 lb bond to 110 lb cover (52 to 300 g/m ²)		
	Paper Types ⁸⁴	Thin, Plain, Heavy, Recycled, Color, Pre-Punched, Transparency, Tracing, 1-Sided Coated, 2-Sided Coated, Matte Coated, Textured, Labels, Bond, Tab, Envelope, Letterhead		
Warm-Up Time ⁸⁵		After Powering On ⁸⁶ 30 seconds or less		
First Copy Time	Color	Up to 5.4 seconds	Up to 5.9 seconds	
	B&W	Up to 4.4 seconds	Up to 4.8 seconds	

81 When using the <Fax>, <Scan and Send>, or <Scan and Store> function, you can scan the originals up to 11 7/8" x 16 3/4" (301 mm x 424 mm) (A3+) or 11 1/8" x 17 1/8" (283.4 mm x 435.8 mm) (11x17+).

82 When the <LTRR/STMT Original Selection> setting is used, the scanner is able to detect whether the original is LTRR or STMT.

83 Long Sheets up to 13" x 51.2" (330.2 x 1,300 mm) is available from the multipurpose tray via a service mode setting. Note running long sheets may have a significant impact on running cost.

84 Reference [Registered Paper Types and Weight](#) for the available paper weights.

85 Activation time may vary, depending on the environment and conditions under which the machine is being used.

86 If <Quick Startup Settings for Main Power> is set to "On", it takes 4 seconds until the key operation on the touch panel display is available. Depending on the situations, the machine does not startup quickly.

Item	Specifications
Paper Size/Weight/Type	Size 13" x 19", 12 5/8" x 17 11/16", 12"x18", 11"x17", LGL, LTR, LTRR, STMTR, EXEC, and Custom size (5 1/2" x 5 7/8" to 13" x 19 1/4" (139.7 mm x 148 mm to 330.2 mm x 487.7 mm))
	Weight 14 lb bond to 110 lb cover (52 to 300 g/m ²)
	Type Thin, Plain, Heavy, Recycled, Color, Pre-Punched, Transparency, Tracing, 1-Sided Coated, 2-Sided Coated, Matte Coated, Textured, Labels, Bond, Tab, Envelope, Letterhead
Paper Capacity	Upper/Lower Tray 200 sheets (or 24 mm in height) (20 lb bond (80 g/m ²) / 19.9 lb bond (75 g/m ²) / 17 lb bond (64 g/m ²) x 2
Power Source/Maximum Power Consumption	AC 100 - 240 V, 50/60 Hz, 1.0 A / Approximately 120 W
Dimensions (W x D x H)	29 3/8" x 31 1/4" x 55 3/8" (746 x 793 x 1,407 mm)
Weight	Approximately 134 lb (61 kg)
Installation Space Including the Main Unit (W x D)	132 5/8" x 36 7/8" (3,368 mm x 937 mm) (When the Booklet Finisher-X1, Paper Folding Unit-J1, and Multi-drawer Paper Deck-C1 are attached, and the auxiliary tray of the output tray is extended)

88 For the details on the stacking capacity by paper type, size, and delivery mode, refer to the Staple Finisher-AC1 or Booklet Finisher-AC1 specifications.

89 If the paper width is from 7 1/8" (210 mm) to 9.1" (232 mm), the alignment position is fixed, and the shift amount changes, depending on the paper width.

Table 80 – Paper Folding Unit-J1 Specifications

Item	Specifications
Paper Size/Weight/Type	<p>Size Z-Fold: 11" x 17", LGL, and LTRR C-Fold: LTRR Accordion Z-Fold: LTRR Double Parallel Fold: LGL, LTRR Half Fold: LTRR</p> <p>Weight Z-Fold: 14 to 28 lb bond (52 to 105 g/m²) C-Fold: 14 to 28 lb bond (52 to 105 g/m²) Accordion Z-Fold: 14 to 28 lb bond (52 to 105 g/m²) Double Parallel Fold: 14 to 24 lb bond (52 to 90 g/m²) Half Fold: 14 to 28 lb bond (52 to 105 g/m²)</p> <p>Type Thin paper, Plain paper, Recycled paper, Color paper and Bond paper</p>
Capacity of the exit slot of the paper folding unit	<p>Z-Fold and Half Fold Depends on the specifications of Staple Finisher-X1/Booklet Finisher-X1</p> <p>C-Fold and Accordion Z-Fold 40 sheets</p> <p>Double Parallel Fold 25 sheets</p>
Power Source	From the finisher
Dimensions (W x D x H)	13 1/4" x 31 1/4" x 46 7/8" (336 x 793 x 1,190 mm)
Weight	Approximately 156 lb (71 kg)
Installation Space Including the Main Unit (W x D)	132 5/8" x 36 7/8" (3,368 mm x 937 mm) (When the Booklet Finisher-X1, Document Insertion Unit-N1, and Multi-drawer Paper Deck-C1 are attached, and the auxiliary tray of the output tray is extended)

Table 81 – Document Insertion Unit-Q1 Specifications

Item	Specifications
Paper Size/Weight/Type	<p>Size 13" x 19", 12 5/8" x 17 11/16", 12"x18", 11"x17", LGL, LTR, LTRR, STMTR, EXEC, and Custom size (5 1/2" x 5 7/8" to 13" x 19 1/4" (139.7 mm x 148 mm to 330.2 mm x 487.7 mm))</p> <p>Weight 14 lb bond to 110 lb cover (52 to 300 g/m²)</p> <p>Type Thin, Plain, Heavy, Recycled, Color, Pre-Punched, Transparency, Tracing, 1-Sided Coated, 2-Sided Coated, Matte Coated, Textured, Labels, Bond, Tab, Envelope, Letterhead</p>
Paper Capacity	100 Sheets (1/2" (12 mm) in height) (20 lb bond (80 g/m ²) / 19.9 lb bond (75 g/m ²) / 17 lb bond (64 g/m ²))
Power Source/Maximum Power Consumption	100 - 240 V AC, 50/60 Hz, 1.0 A / Approximately 100 W
Dimensions (W x D x H)	26 1/8" x 26 3/4" x 48 7/8" (662 x 679 x 1,242 mm)
Weight	Approximately 88.2 lb (40 kg)
Installation Space Including the Main Unit (W x D)	93 3/4" x 36 7/8" (2,381 mm x 937 mm) (When the Booklet Finisher-AC1 and POD Deck Lite-C1 are attached, and the auxiliary tray of the output tray and rotation tray are extended)

Item	Specifications
Paper Size/Weight/Type	<p>Size Z-Fold: 11" x 17", LGL, and LTRR C-Fold: LTRR</p> <p>Weight Z-Fold: 16 to 28 lb bond (60 to 105 g/m²) C-Fold: 16 to 28 lb bond (60 to 105 g/m²)</p> <p>Type* C-Fold/Z-Fold: Thin, Plain, Color, and Recycled</p> <p>Insertion Unit: Thin, Plain, Heavy 1, Heavy 2, Heavy 3, Heavy 4, Heavy 5, Heavy 6, Color, Recycled, Tab, Bond, Letterhead, and Coated</p>
Capacity of the exit slot of the paper folding unit	<p>Z-Fold Depends on the specifications of an output finisher</p> <p>C-Fold 40 sheets (2 3/8" (60 mm) in height) (20 lb bond (80 g/m²) / 19.9 lb bond (75 g/m²) / 17 lb bond (64 g/m²))</p>
Document insertion unit capacity	100 sheets (1/2" (12 mm) in height) (20 lb bond (80 g/m ²) / 19.9 lb bond (75 g/m ²) / 17 lb bond (64 g/m ²))
Power Source/Maximum Power Consumption	Approximately 100 - 240 V AC, 50/60 Hz, 1.0 A/ 120 W or less
Dimensions (W x D x H)	26 1/8" x 26 3/4" x 48 7/8" (662 x 679 x 1,242 mm)
Weight	Approximately 167.6 lb (76 kg)
Installation Space Including the Main Unit (W x D)	93 3/4" x 36 7/8" (2,381 mm x 937 mm) (When the Booklet Finisher-AC1, and POD Deck Lite-C1 are attached, and the auxiliary tray and rotation tray are extended)

Table 83 – Multi Function Professional Puncher-B1

Item		Specification
Die Sets (optional)		Loose Leaf 3-Hole Punch (round) Loose Leaf 5-Hole Punch (round) Velo Bind 11-Hole Punch (round) Plastic Comb 19-Hole Punch (rectangle) Twin Loop 21-Hole Punch (rectangle) Twin Loop 32-Hole Punch (square) Color Coil 44-Hole Punch (round) Color Coil 44-Hole Punch (oval) High Durability Color Coil 44-Hole Punch (round) High Durability Loose Leaf 3-Hole Punch (round) High Durability Plastic Comb 19-Hole Punch (rectangle)
Bypass Feeding	Paper Size	Maximum: 13" x 30" (330.2 mm x 762 mm) Minimum: 4" x 5 7/8" (100 mm x 148 mm)
	Paper Weight	Plain: 13 lb bond to 130 lb cover (50 g/m ² to 350 g/m ²) Coated: 26 lb cover to 130 lb cover (70 g/m ² to 350 g/m ²)
Punch	Paper Size	Letter, Legal, 11x17, 12 x18
	Paper Weight	Plain: 20 lb bond to 110 lb cover (75 g/m ² to 300 g/m ²) Coated: 44 lb cover to 110 lb cover (118 g/m ² to 300 g/m ²)
	Waste Tray Capacity	Up to 70,000 sheets or more of 80 g/m ² paper with 4-hole punch
	Punch Die Life Cycle ⁹⁰	Standard Die: 750,000 Cycles, High Durability Die: 4,000,000 Cycles Cycles (Die life can vary based on paper types and weights used)
Power Source		120-127 V AC, 60 Hz, 3.8 A
Maximum Power Consumption		550 W or less
Dimensions (H x W x D)		Approximately 41" x 31 1/4" x 17 1/2" (1,040 mm x 795 mm x 445 mm)
Weight		Approximately 225 lb (102 kg)

Note: The Multi Function Professional Puncher-B1 does not support punching OHP/transparent media.

⁹⁰ Die life can vary based on paper types and weights used.

Table 84 – Copy Card Reader-F1 Specifications

Item	Specifications
Available Cards	Magnetic
Card Readout Method	Magnetic readout
Magnetic Card Reading Direction	Face up
Store/Replay	Replay
Power Source	From the main unit
Dimensions (W x L x H)	3 1/2" x 3 13/16" x 1 5/8" (88 mm x 96 mm x 40 mm) (excluding the attachment kit and cable)
Weight	Approximately 7.1 oz (200 g) (including the attachment kit and cable)

Table 85 – Super G3 Fax Board-AS2 Specifications

NOTE: Specifications remain the same even when the Super G3 2nd Line Fax Board-AS1 or Super G3 3rd/4th Line Fax Board-AS1 is installed.

Item	Specifications
Telephone Line Used	Public Switched Telephone Network (When using an IP telephone service, facsimile communication may not be performed normally via an IP telephone line. It is recommended to use facsimile communication via a general telephone (Public Switched Telephone Network) line.)
Scan Line Density (Scan Transmission)	Normal: 8 pels (Picture elements (pixels).)/mm x 3.85 line/mm Fine: 8 pels/mm x 7.7 line/mm Super-Fine: 8 pels/mm x 15.4 line/mm Ultra-Fine: 16 pels/mm x 15.4 line/mm
Transmission Speed	Super G3: 33.6 kbps G3: 14.4 kbps
Compression Method	MH, MR, MMR, and JBIG
Transmission Type	Super G3 and G3
Sending Original Sizes	11" x 17", LGL, LTR, LTRR and STMTR
Receiving Paper Sizes	LGL, LTR, LTRR, STMTR and 11" x 17"
Number of Memory RX Jobs	Up to 320 jobs
Transmission Times	JBIG: Approximately 2.6 seconds (When sending LTR original paper, Normal 8 pels x 3.85 line/mm ECM (JBIG))

Table 87 – Send Function (Push Scan)

Item	Specifications
Type	Color Scanner
Maximum Original Scanning Size	Depends on copy specifications
Resolution for Scan	100x100 dpi, 150x150 dpi, 200x100 dpi (Normal), 200x200 dpi (Fine), 200x400 dpi (Superfine), 300x300 dpi, 400x400 dpi (Ultrafine), 600x600 dpi
Scanning Speed	See the feeder specifications.
Interface	1000 Base-T/100 Base-TX/10 Base-T (IEEE 802.3 compliant)
Protocol Supported	File: FTP (TCP/IP), SMB (TCP/IP), WebDAV E-mail/I-Fax: SMTP (send), POP3 (receive)
Output Format	Single-Page TIFF (MMR), JPEG*, PDF (Compact, OCR (Text Searchable), Optimize PDF for Web, Format to PDF/A, Trace & Smooth, Encrypt), XPS (Compact), PDF/XPS (Device Signature, User Signature), Office Open XML (PowerPoint, Word) * Single-Page Only

Table 88 – Send Function (Pull Scan)

Item	Specifications
Maximum Original Scanning Size	Depends on copy specifications
Color Mode	Color/Black-and-White Auto Switch, Color, Black-and-White, Grayscale
Resolution for Scan	75 dpi x 75 dpi to 600 dpi x 600 dpi (in 1 dpi increments)
Compatible OS	Windows 7/Windows 8.1/Windows 10/Windows Server 2008 /Windows Server 2008 R2/Windows Server 2012/Windows Server 2012 R2/Windows Server 2016
Interface	USB2.0High-Speed, 1000Base-T/100Base-TX/10Base-T (IEEE 802.3 compliant)
Protocol Supported	TCP/IP
Driver	TWAIN compliant, WIA Compliant (Color Network ScanGear 2. For both TWAIN and WIA)

Table 89 – Send Function (Internet/Intranet Fax)

Item	Specifications
Communication Protocol	<p>Internet FAX SMTP (send*)/POP3 (receive**)</p> <p>Intranet FAX SMTP (send/receive*)</p> <p>* Supports SMTP authentication and encrypted communication (TLS) during SMTP send/receive ** Supports APOP/POP before SMTP and encrypted communication (TLS) during POP RX</p>
Communication Mode	Simple mode, Full mode (ITU-T T.37 and W-NET FAX compliant, color supported)
Resolution	<p>Black-and-White 200 x 100 dpi, 200 x 200 dpi, 200 x 400 dpi*, 300 x 300 dpi*, 400 x 400 dpi*, 600 x 600 dpi*</p> <p>Color 100 x 100 dpi*, 200 x 200 dpi*, 300 x 300 dpi*, 400 x 400 dpi*, 600 x 600 dpi*</p> <p>* Available depending on settings of the other party (capability setting of the receiving machine).</p>

Table 90 – Network Environment Wired LAN Specifications

Item	Specifications
Network Interface	10Base-T/100Base-TX/1000Base-T (RJ-45)
Protocol Supported	<p>TCP/IP</p> <ul style="list-style-type: none"> • Frame type: Ethernet II • Print applications: LPD/Raw/IPP/IPPS/FTP/WSD/Mopria/AirPrint/Windows 10 Mobile Print <p>AppleTalk</p> <ul style="list-style-type: none"> • Frame type: Ethernet SNAP • Print application: PAP (Printer Access Protocol)

Table 91 – Network Environment Wireless LAN Specifications

Item	Specifications
Standard	IEEE 802.11g, IEEE 802.11b, IEEE 802.11n
Transmission Scheme	IEEE 802.11b (Modulation system: DS-SS) IEEE 802.11g (Modulation system: OFDM method) IEEE 802.11n (Modulation system: OFDM method)
Frequency Range	2.412 to 2.462 GHz
Maximum Radio-Frequency Power Transmitted	18.21 dBm
Security	<p>Infrastructure Mode 128 (104)/64 (40) bit WEP WPA-PSK (TKIP/AES-CCMP) WPA2-PSK (TKIP/AES-CCMP) WPA-EAP (AES-CCMP) WPA2-EAP (AES-CCMP)</p> <p>Access Point Mode / Wi-Fi Direct Mode WPA2-PSK (AES-CCMP)</p>
Connection Method	WPS (Wi-Fi Protected Setup), Manual setup

Table 93 – Advanced Box Functions

Item	Specifications
Storage Capacity	Standard: 16 GB Maximum: 480 GB (optional)
Maximum Path Length	256 characters
Maximum Number of Files a Single Directory Can Hold	1,000 (including folders)
Maximum Number of Files the Advanced Space Can Hold	100,000 (including folders)
Maximum Capacity per File	2 GB
Number of Clients Allowed for Accessing	SMB: 64 WebDAV: 3

Table 94 – Mail Box Functions

Item	Specifications
Number of Boxes	100 boxes
File Format for Storing	Proprietary format
Resolution for Storing	Copy: (Black and White/Color) 600 dpi x 600 dpi Scan and Store: (Black and White/Color) 600 dpi x 600 dpi Scan and Send: (Black and White/Color) 100 dpi x 100 dpi, 150 dpi x 150 dpi, 200 dpi x 100 dpi, 200 dpi x 200 dpi, 200 dpi x 400 dpi, 300 dpi x 300 dpi, 400 dpi x 400 dpi, 600 dpi x 600 dpi Printer Driver: (Black and White/Color) 600 dpi x 600 dpi, 1200 dpi x 1200 dpi
Disk Capacity	Standard: approximately 65 GB Maximum: 98 GB (optional)
Storage Capacity	2,000 files (30,000 pages)*1
Data Storage Period	3 days (can be changed from the Settings/Registration screen)

Table 95 – ImagePASS-N2 V1.1

Item	Specifications
Platform	E400
Code Base	FS350
OS	Linux
CPU	Intel Pentium G4400, 3.3GHz
Standard Memory	4 GB (4 GB x 1) DDR4-2133MHz
Optional Memory	N/A
Hard Disk Drive	500 GB SATA, 2.5 inch.
LED	Diagnosis: 7-SEGMENT
Video board	Honeycrisp
Video IF	DDI-07 (Open IF)
Ethernet port to LAN	10Base-T/100Base-TX/1000Base-T
Ethernet port to engine	1000Base-T
Token Ring	Not supported
Network Protocol	AppleTalk, TCP/IP, IPSec, Certificate Management
PDL	PS3 CPSI 3020
Fonts	PS: 138 fonts PCL: 113 fonts
Supported Engine	imageRUNNER ADVANCE DX C7700 Series imageRUNNER ADVANCE C7500 III Series
GUI (FACI-Kit)	N/S
Actual Power consumption while printing	47W or less 100-240V, 50/60Hz, 3.0A or 3.0-1.3A
Size (W x D x H)	Approximately 11 1/4" x 3 5/8" x 11 5/8" (28.5cm x 9.3cm x 29.5cm)
Weight	Approximately 10.9 lb (4.95kg) with Plate

C. CANON imageRUNNER ADVANCE DX C7780i/C7770i/C7765i SERIES LIMITED WARRANTY

Canon U.S.A., Inc. or Canon Canada Inc. (as applicable, "Canon") warrants the imageRUNNER ADVANCE DX C7780i/C7770i/C7765i Series product and Canon brand options designed for use with the imageRUNNER product (collectively the "Product") to be free from defects in workmanship and materials under normal use and service for a period of 90 days after delivery to the original purchaser ("Purchaser") or 90,000 prints or copies (or a combination of both), whichever comes first. During such warranty period, Canon shall replace, without charge, any defective part with a new or comparable rebuilt part. This warranty shall not extend to consumables such as paper, chemicals, and toner as to which there shall be no warranty or replacement. Warranty replacement shall not extend the original warranty period of the Product.

This limited warranty shall only apply if the Product is used in conjunction with compatible computers, peripheral equipment and software. Canon shall have no responsibility for such items except for compatible Canon brand peripheral equipment covered by a separate warranty ("Separate Warranty"). Repairs of such Canon brand peripheral equipment shall be governed by the terms of the Separate Warranty. Non-Canon brand equipment that may be distributed with the Product is sold "AS IS" and without warranty of any kind by Canon, including any implied warranty regarding merchantability or fitness for a particular purpose, and all such warranties are disclaimed. The sole warranty, if any, with respect to such non-Canon brand items is given by the supplier or producer thereof. For further information on software, see below.

This warranty shall be void and of no force and effect if the Product is damaged as a result of (a) abuse, neglect, mishandling, alteration, electric current fluctuation or accident, (b) improper use, including failure to follow operating or maintenance instructions or environmental conditions prescribed in Canon's operator's manual or other documentation, (c) installation or repair by other than authorized service representatives qualified by Canon who are acting in accordance with Canon's service bulletins, (d) use of supplies or parts (other than those distributed by Canon) which damage the Product or cause abnormally frequent service calls or service problems, or (e) use of the Product with non-compatible computers, peripheral equipment or software, including the use of the Product in any system configuration not recommended in any manual distributed with the Product. Nor does this warranty extend to any Product on which the original identification marks or serial numbers have been defaced, removed, or altered.

ANY SOFTWARE THAT IS DISTRIBUTED WITH THE PRODUCT AND HAS AN ASSOCIATED END USER AGREEMENT IS LICENSED, WARRANTED AND PROVIDED ACCORDING TO THE TERMS OF THAT AGREEMENT, INCLUDING ANY LIMITATIONS AND DISCLAIMERS THEREIN. SUCH SOFTWARE IS SOLD WITHOUT WARRANTY OF ANY KIND BY CANON. PLEASE CONTACT CANON IMMEDIATELY IF YOU HAVE NOT RECEIVED A COPY OF THE SOFTWARE SUPPLIER'S END USER AGREEMENT. CANON RECOMMENDS THAT DATA STORED ON THE PRODUCT'S HARD DISK DRIVE BE DUPLICATED OR BACKED UP TO PREVENT ITS LOSS IN THE EVENT OF FAILURE OR OTHER MALFUNCTION OF THE HARD DISK DRIVE.

THE ABOVE WARRANTIES ARE IN LIEU OF ALL OTHER WARRANTIES AND CONDITIONS, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES AND CONDITIONS REGARDING MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, RELATING TO THE USE OR PERFORMANCE OF A PRODUCT OR ANY ASSOCIATED COMPONENT, AND ALL SUCH OTHER WARRANTIES AND CONDITIONS ARE DISCLAIMED. NO OTHER EXPRESS WARRANTY, CONDITION OR GUARANTEE, EXCEPT AS MENTIONED ABOVE, GIVEN BY ANY PERSON, FIRM OR CORPORATION WITH RESPECT TO THE PRODUCT SHALL BIND CANON ANY SUPPLIER OR ANY AUTHORIZED SERVICE PROVIDER. NO WARRANTY IS GIVEN ON ANY USED PRODUCT.

NEITHER CANON OR ITS SUPPLIERS NOR ANY AUTHORIZED SERVICE PROVIDER SHALL BE LIABLE FOR PERSONAL INJURY OR PROPERTY DAMAGE (UNLESS CAUSED SOLELY AND DIRECTLY BY THE NEGLIGENCE OF CANON OR ANY AUTHORIZED SERVICE PROVIDER), LOSS OF REVENUE OR PROFIT, FAILURE TO REALIZE SAVINGS OR OTHER BENEFITS, EXPENDITURES FOR SUBSTITUTE EQUIPMENT OR SERVICES, LOSS OR CORRUPTION OF DATA, INCLUDING, WITHOUT LIMITATION, DATA STORED ON THE PRODUCT'S HARD DISK DRIVE, STORAGE CHARGES OR OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES CAUSED BY THE USE, MISUSE OR INABILITY TO USE THE PRODUCT, REGARDLESS OF THE LEGAL THEORY ON WHICH THE CLAIM IS BASED AND EVEN IF CANON OR ITS SUPPLIERS OR ANY AUTHORIZED SERVICE PROVIDER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. NOR SHALL RECOVERY OF ANY KIND AGAINST CANON OR ITS SUPPLIERS OR ANY AUTHORIZED SERVICE PROVIDER BE GREATER IN AMOUNT THAN THE PURCHASE PRICE OF THE PRODUCT CAUSING THE ALLEGED DAMAGE. WITHOUT LIMITING THE FOREGOING, THE PURCHASER ASSUMES ALL RISKS AND LIABILITY FOR LOSS, DAMAGE OR INJURY TO PERSONS AND PROPERTY OF THE PURCHASER OR OTHERS ARISING OUT OF THE POSSESSION, USE, MISUSE, OR INABILITY TO USE THE PRODUCT NOT CAUSED SOLELY AND DIRECTLY BY THE NEGLIGENCE OF CANON OR ANY AUTHORIZED SERVICE PROVIDER. THIS WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THE PRODUCT AND STATES SUCH PURCHASER'S EXCLUSIVE REMEDY.

CONDITIONS OF WARRANTY

Defective parts must be returned to Canon or an Authorized Service Provider with all necessary documentation and will become the property of Canon.

THIS WARRANTY APPLIES TO PRODUCTS SOLD AND USED IN THE U.S.A. AND CANADA ONLY.
